

## Oil Filling Machine Stainless Steel Granulation Equipment For Powders 1200\*800\*1500mm Dimensions

Our Product Introduction

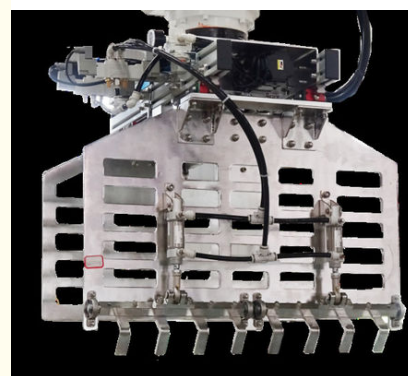

### Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG20F
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

### Product Specification

- Features: High Efficiency, Easy Operation, Low Noise
- Warranty: 1 Year
- Dimension: 1200\*800\*1500mm
- Moisture Content Of Raw Material: ≤15%
- Weight: 500-1000kg
- Material: Stainless Steel
- Power: 5-30 KW
- Frequency: 50Hz
- Highlight: Powders Oil Filling Machine,  
Stainless Steel Oil Filling Machine,  
1200\*800\*1500mm Oil Filling Machine

## Product Description

### Oil Filling Machine Stainless Steel Granulation Equipment For Powders 1200\*800\*1500mm Dimensions

#### Product Description:

One of the key features of the Powder Granulator Series is its ability to handle raw materials with a moisture content of  $\leq 15\%$ . This ensures that the granules produced are of uniform size and shape, with no clumping or sticking. The granulator is also designed to be easy to clean and maintain, making it an ideal choice for those who value efficiency and productivity.

With a weight of 500-1000kg, the Powder Granulator Series is a robust and reliable machine that can handle even the toughest of materials. It comes with a 1-year warranty, giving you peace of mind and ensuring that you get the most out of your investment. Whether you are looking to produce granules for use in pharmaceuticals, chemicals, or food, the Powder Granulator Series is the ideal choice.

#### Technical Parameters:

Technical Parameters	Value
Product Name	Particle Forming Granulator
Model	PGS
Granulation Rate	$\geq 95\%$
Weight	500-1000kg
Features	High Efficiency, Easy Operation, Low Noise
Moisture Content Of Raw Material	$\leq 15\%$
Capacity	1-10 Tons/hour
Application	Pharmaceutical, Chemical, Food, And Other Industries
Frequency	50Hz
Material	Stainless Steel
Warranty	1 Year

#### Applications:

The powder compaction granulator is perfect for the processing of raw materials with a moisture content of up to 15%. The unit is capable of handling large volumes of powder material, making it an ideal choice for industrial-scale production. The product is designed to create uniform and high-quality granules, ensuring consistent results every time.

The powder processing granulator is perfect for use in the pharmaceutical industry, where precise and accurate granule size is critical. The product is capable of producing granules in various sizes, making it ideal for use in the production of tablets, capsules, and other pharmaceutical products. The unit is designed to be easy to operate, with intuitive controls that allow for precise adjustments to the granulation process.

The powder spheroidization granulator is a versatile unit that can be used in a wide range of industrial applications. The product is designed to create perfectly spherical granules, making it ideal for use in the production of fertilizers, detergents, and other products that require uniform and consistent granule size. The unit is designed to be compact and easy to operate, with a small footprint that makes it ideal for use in small production facilities.

With its compact design and powerful motor, the 25L plastic square barrel filling production line is the perfect choice for any industrial-scale powder processing application. The product is capable of producing up to 10 tons of granules per hour, making it an ideal choice for high-volume production facilities. The unit is designed to be reliable and easy to maintain, ensuring that it will provide years of trouble-free performance.

The unit's dimensions of 1200\*800\*1500mm make it easy to integrate into existing production lines, while its versatility makes it the perfect choice for a wide range of industrial applications. Overall, the 25L plastic square barrel filling production line is a reliable and versatile powder granulator series that is a must-have for any industrial-scale powder processing operation.

## Support and Services:

The Powder Granulator Series product is designed to provide high-quality granulation of various dry materials. Our technical support and services include:

- Installation and commissioning: Our team of experts will assist in the installation and commissioning of the powder granulator series product to ensure optimal performance and minimal downtime.
- Maintenance and repairs: We offer regular maintenance services, including inspections, cleaning, and repairs, to ensure the longevity and efficient functioning of the powder granulator series product.
- Training and consultation: We provide training and consultation services to our customers to ensure they understand the operation and maintenance of the powder granulator series product.
- Upgrades and customization: We offer upgrades and customization options to meet specific customer needs, including modifications to the machine's design, controls, and software.

## Packing and Shipping:

Product Packaging:

The Powder Granulator Series product is carefully packaged to ensure safe delivery to our customers. Each unit is wrapped in a protective layer and placed in a sturdy carton box. The package also includes an instruction manual and any necessary accessories.

Shipping:

We offer free shipping of the Powder Granulator Series product to all domestic customers. For international customers, shipping fees may apply depending on the destination country. We use trusted and reliable shipping carriers to ensure timely delivery of the product.

## FAQ:

**Q: What is the brand name of the powder granulator series product?**

A: The brand name of this product is 25L plastic square barrel filling production line.

**Q: What is the capacity of the plastic square barrel?**

A: The plastic square barrel has a capacity of 25 liters.

**Q: What type of materials can be granulated using this product?**

A: This powder granulator series product can be used to granulate a variety of materials such as pharmaceuticals, chemicals, food, and agricultural products.

**Q: What is the output capacity of the filling production line?**

A: The output capacity of the filling production line depends on the specific product being filled and the speed of the production line. Please consult the product manual or contact customer service for more information.

**Q: Is the filling production line easy to operate and maintain?**

A: Yes, the filling production line is designed for easy operation and maintenance. The product manual provides clear instructions and our customer service team is always available to assist with any questions or concerns.
