

Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: ISO9001
- Model Number: SG1-5F
- Minimum Order Quantity: 1
- Price: 10000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, D/A, D/P
- Supply Ability: 10per year

Product Specification

- Product Name: Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
- Filling Accuracy: $\pm 0.5\%$
- Suitable Bottle Type: Round/Square/Flat Bottles
- Application: Liquid Filling
- Control System: PLC
- Filling Nozzles: 4
- Material: Stainless Steel
- Product: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
- Highlight: volumetric barrel liquid filling machine, volumetric liquid filling machine series, water based barrel liquid filling machine

Product Description

Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine

This machine is suitable for weighing and filling 1-5L containers, automatically completing a series of operations including counting, filling based on weight, and conveying. It is especially suitable for quantitative filling of liquids and raw materials, making it an ideal packaging machine for industries such as petrochemicals, coatings, pharmaceuticals, and chemicals. The machine adopts a programmable logic controller (PLC) and a touchscreen for operation control, making it easy to adjust and use.

Product Description:

- ★ Touch screen control, easy to operate
- ★ The whole machine is removable and flexible
- ★ The filling head can swing, making filling convenient

Filling quantity	≤40kg
filling speed	8-25 pieces/minute
Overall dimensions (mm)	2500*1100*2200mm
strength	AC380/220 50HZ

Function:

- Instant working status indication and clock display
- Digital setting input weight, multiple formula storage
- Tare weight detection starts all-round barreling
- Gross weight/net weight (automatic tare removal per barrel) filling method
- Automatic zero tracking, bucket quantity, weight accumulation
- Start automatic reset and power-off protection device
- Emergency stop protection device
- Factory settings can be restored by misoperation
- With fault detection function, easy maintenance
- Flexible movement, explosion-proof configuration, simple operation
- Automatic correction of weight errors

Feature:

Explosion-proof filling machine, personalized design, one operator, can fill two barrels at the same time.

The position of the bucket can be adjusted according to the workers' operating habits, the drum is conveyed, and the filling height is adjustable.

It is suitable for filling various large barrels, such as round barrels and inclined barrels. It has multiple discharging mode settings to meet customers' multi-purpose, various filling and fluidity, and ensures fast filling accuracy and good filling accuracy. Stabilize.

Reduce waste, save costs, and reduce workers' operating pressure.

About Us:

SG (Changzhou) Intelligent Technology Co., Ltd. is a well-known domestic professional manufacturer of filling equipment for coatings, paints, chemicals, etc.

The company has a group of professional technical talents, equipped with advanced production equipment, established a complete quality system, and established a product research and development center.

Our company's filling equipment line is suitable for water-based paint, home decoration paint, waterproof and anti-corrosion paint; industrial paint, anti-corrosion paint, floor paint, interior and exterior wall paint, real stone paint; resin, diluent, solid chemical agent, varnish; automotive paint, putty, marble glue, AB glue, white latex; shoe glue, all-purpose glue, spray glue, neoprene; ink, electroplating solution, lubricating oil, pesticides, daily chemicals and other liquid, powdery and granular forms.

The company's filling machine products can meet customers' new requirements from semi-automatic and fully automatic to intelligent and environmentally friendly, and can be composed of automatic barrel loading, filtering, filling, capping, capping, labeling, coding, palletizing, Rewinding and other overall assembly lines.

The company introduces foreign technology research.

Self-cleaning filters solve problems in the filtration field.

WHY CHOOSE US

We are a professional coating filling machine manufacturer.

The company has set up a product research and development center.

We guarantee the high quality of our products.

The company has professional and technical personnel to solve your problems.
