

## Grinding Pulverizer Machine PLC Controlled Yellow Palletizing Equipment / Palletizer For Automated Goods Palletizing

Our Product Introduction

for more products please visit us on [sg-packs.com](http://sg-packs.com)

### Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

### Product Specification

- Product Name: Grinding Pulverizer Machine PLC Controlled Yellow Palletizing Equipment / Palletizer For Automated Goods Palletizing
- Control System: PLC
- Color: Yellow
- Safety Features: Emergency Stop Button, Safety Sensors
- Capacity: Up To 2000 Units Per Hour
- Type: Palletizer
- Product Type: Industrial Equipment
- Weight: Varies Depending On Model
- Highlight: Grinding palletizer machine, palletizer machine PLC Controlled, Goods Palletizing Equipment

## Product Description

### Grinding Pulverizer Machine PLC Controlled Yellow Palletizing Equipment / Palletizer For Automated Goods Palletizing

#### Product Description:

Our Palletizer is specifically designed for palletized loading, making it the perfect Pallet Packaging System for your business. With its ability to handle up to 2000 units per hour, you can rest assured that your packaging process will be completed in the most efficient way possible. Our Palletizer is powered by electricity, ensuring consistent and reliable performance every time.

In addition to its impressive capacity and power source, our Palletizer also comes equipped with a Pallet Tracking System. This system allows you to keep track of your pallets throughout the packaging process, ensuring that everything is accounted for and nothing is lost. This feature is especially useful for businesses with large-scale packaging operations.

Our Palletizer is the perfect addition to any business looking to improve their packaging process. With its durable steel material, powerful electric motor, and advanced Pallet Tracking System, you can rest assured that your packaging process will be streamlined and efficient. So why wait? Order your Palletizer today and experience the benefits of a top-of-the-line Pallet Packaging System for yourself!

#### Applications:

The palletizer is an essential product for palletized loading, which is a common requirement in many industries. It is suitable for loading various goods onto pallets, including boxes, bags, and other materials. The product is designed to handle heavy loads, making it ideal for industries that deal with large quantities of goods.

The palletizer has a pallet tracking system that ensures the pallets are loaded correctly and in the right order. This system maintains the integrity of the pallets and minimizes the risk of damage during transportation. It is a critical feature for industries that deal with delicate or fragile products.

The palletizer has a pallet stacking system that stacks the pallets in an organized and efficient manner. This system ensures that the pallets are stacked in a way that maximizes the available space, reducing the need for additional storage space. It is a useful feature for industries that have limited storage space.

The Column type robot palletizer is suitable for a wide range of industries, including food and beverage, pharmaceuticals, and manufacturing. It is ideal for industries that require high-speed palletizing, ensuring that the loading process is fast and efficient. The product is also suitable for industries that require consistent palletizing, ensuring that the same quality of loading is maintained throughout the process.

In conclusion, the Column type robot palletizer is a versatile product that is suitable for various industries. Its palletized loading, pallet tracking system, and pallet stacking system make it an ideal product for industries that require efficient and organized loading. It is a CE certified product made of durable steel material and has a user-friendly control system with a PLC. The product comes in varying models with different weight capacities depending on the user's needs and comes in a vibrant yellow color.

#### Customization:

Our Column type robot palletizer product can be customized to meet your specific needs. We offer product customization services for our palletizing equipment, including the incorporation of a pallet tracking system and a pallet packaging system. Our palletizers are CE certified and operate at a capacity of up to 2000 units per hour. The voltage is 380V and the dimensions can be customized to fit your unique space requirements. As a type of palletizer, our product is commonly used in packaging applications.

## Support and Services:

Our Palletizer product comes with comprehensive technical support and services to ensure smooth and efficient operation:

- Initial installation and setup assistance
- On-site training for operators and maintenance personnel
- Ongoing technical support via phone or email
- Remote troubleshooting and diagnostics
- Emergency on-site support for critical issues
- Preventative maintenance programs to optimize performance and longevity

## Packing and Shipping:

Product Packaging:

The Palletizer product will be packaged securely in a cardboard box with foam inserts to protect the product during shipping. The product will also be wrapped in bubble wrap to prevent any scratches or damage during transportation.

Product Shipping:

The Palletizer product will be shipped via a reputable courier service to ensure timely and safe delivery. Shipping costs may vary depending on the destination and the weight of the package. Customers will receive a tracking number upon shipment so they can track the progress of their order.

## FAQ:

Q: What is a column type robot palletizer?

A: A column type robot palletizer is a type of machine that uses robotic arms to stack and organize products onto pallets.

Q: What is the certification of this palletizer?

A: This palletizer is CE certified, ensuring that it meets European safety, health, and environmental protection standards.

Q: What products can be palletized with this machine?

A: This machine can palletize a wide variety of products, including boxes, bags, bottles, and more.

Q: What is the maximum weight capacity of this palletizer?

A: The maximum weight capacity of this palletizer depends on the specific model, but it can range from 50 kg to 2000 kg.

Q: Can this palletizer be customized for specific needs?

A: Yes, this palletizer can be customized for specific needs, including different product sizes, shapes, and weight capacities.
