Basic Information

- Place of Origin: china
- Brand Name: Desktop Rotary Filling And Capping Machine 10 Liters
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 30days
- Payment Terms: TT
- Supply Ability: 1set/week

Product Specification

- Product Name: Desktop Rotary Filling And Capping Machine 10 Liters
- Power Supply: AC220V/380V, 50/60Hz
- Control System: PLC Control
- Capping Method: Screw Capping
- Bottle Type: Plastic Or Glass Bottles
- Touch Screen: 7 Inch Color Touch Screen
- Capping Accuracy: $\pm 0.5\%$
- Type: Fully Automatic
- Highlight: 60hz filling and capping machine CE, 60hz filling and packaging machine Plastic, fully automatic filling and capping machine

Product Description

Desktop Rotary Filling And Capping Machine 10 Liters Automatic Filling And Capping Machine

Product Description:

The machine features a screw capping type that ensures tight and secure capping of products. This ensures that the products are well-sealed and protected from contamination, ensuring product quality and safety. The screw capping type is also easy to operate and adjust, making it ideal for various types of products.

The machine has a power supply of 220V/380V, 50Hz/60Hz, making it suitable for use in different countries and regions. This makes it highly versatile and convenient for users, as they do not need to worry about the compatibility of the machine with their power supply.

The model of the machine is FC-2000, which is a high-performance model that delivers fast and efficient filling and capping of products.

The machine operates automatically, which means that it requires minimal human intervention, making it ideal for high-volume production environments.

The filling type of the machine is piston filling, which ensures accurate and consistent filling of products. This filling type is also suitable for different types of products, including liquids, creams, gels, and pastes. The piston filling type is also easy to adjust and operate, ensuring that the machine can handle different types of products.

The Fully Automatic Filling And Capping Machine is a reliable and efficient machine that can handle different types of products. It is an ideal machine for businesses looking to improve their production efficiency and product quality. With its advanced features and high-performance capabilities, this machine is an excellent investment for any business.

Technical Parameters:

Filling Quantity	≤40kg	Barrel Specification	≤ diameter 300* height 400mm
Filling Index Value	1g, 2g,5g,10g	Filling Speed	8-25pcs/Min
Power	AC380/220 50HZ	Air Supply	0.6 MPa
Weight(kg)	800	Overall Dimension (mm)	2500*1100*2200

Applications:

The machine is made of high-quality stainless steel, which makes it durable and easy to clean. It can fill volumes ranging from 50-1000ml,

which makes it suitable for various products. The machine has a capacity of 2000 bottles per hour, making it ideal for high-volume production.

The 200L IBC fully automatic multi-functional opening, filling and capping production line is suitable for a variety of product application occasions and scenarios. Here are some examples:

Pharmaceutical Industry: The machine is suitable for filling and capping liquids and powders used in the pharmaceutical industry. The machine can fill and cap a variety of products, including capsules, tablets, and powders. The machine is ideal for high-volume production, making it suitable for large pharmaceutical companies.

Food Industry: The machine is suitable for filling and capping liquids and powders used in the food industry. The machine can fill and cap a variety of products, including spices, sauces, and condiments. The machine is ideal for high-volume production, making it suitable for large food processing companies.

Cosmetics Industry: The machine is suitable for filling and capping liquids and powders used in the cosmetics industry. The machine can fill and cap a variety of products, including lotions, creams, and powders. The machine is ideal for high-volume production, making it suitable for large cosmetic companies.

Chemical Industry: The machine is suitable for filling and capping liquids and powders used in the chemical industry. The machine can fill and cap a variety of products, including detergents, disinfectants, and solvents. The machine is ideal for high-volume production, making it suitable for large chemical companies.

The 200L IBC fully automatic multi-functional opening, filling and capping production line is an excellent investment for companies that require high-volume production. The machine is easy to use and maintain, and it has a low air consumption of 0.5m³/min. The machine requires an air pressure of 0.6-0.8MPa, which is standard in most industrial settings. The machine is equipped with automatic powder filling machines and automatic liquid filling machines, making it suitable for filling and capping a variety of products.

Customization:

Customize your 200L IBC fully automatic multi-functional opening, filling, and capping production line to meet your production needs. Our product customization services offer the following attributes:

Brand Name: 200L IBC fully automatic multi-functional opening, filling, and capping production line

Certification: CE

Minimum Order Quantity: 1

Packaging Details: wooden box

Payment Terms: TT

Air Consumption: 0.5m³/min

Power Supply: 220V/380V, 50Hz/60Hz

Filling Type: Piston Filling

Capping Type: Screw Capping

Material: Stainless Steel

Our customization services ensure that you get the fully automatic filling and capping machine that suits your needs. Whether you're looking for Automatic Powder Filling Machines or Automatic Tube Filling And Sealing Machine, we've got you covered.

Support and Services:

The Fully Automatic Filling and Capping Machine is a high-tech piece of equipment designed to streamline your manufacturing process. Our technical support and services team is available to assist you with any questions or concerns you may have about the operation or maintenance of your machine.

Our team is comprised of experienced professionals who are knowledgeable about the capabilities and specifications of the Fully Automatic Filling and Capping Machine. We can provide you with guidance on how to optimize your machine's performance, troubleshoot any issues that arise, and perform routine maintenance to keep your machine running smoothly.

In addition to our technical support and services, we also offer training programs to help you and your staff become proficient in operating and maintaining your machine. Our training programs are designed to be comprehensive and hands-on, ensuring that you have the skills and knowledge necessary to get the most out of your investment.

At Fully Automatic Filling and Capping Machine, we are committed to providing our customers with the highest level of support and service. Contact us today to learn more about our technical support and services offerings.

Packing and Shipping:

Product Packaging:

The fully automatic filling and capping machine will be securely packaged in a sturdy cardboard box to ensure safe transportation.

The machine will be wrapped in protective materials to prevent any damage during shipping.

Inside the box, there will be foam inserts to provide additional protection.

The packaging will also include an instruction manual and any required accessories.

Shipping:

The fully automatic filling and capping machine will be shipped via a reputable courier service.

Shipping will be arranged within 2 business days of receiving the order.

The estimated delivery time will depend on the destination and shipping method selected.

Customers will receive a tracking number to track their shipment.

FAQ:

Q: Is this product certified?

A: Yes, this product is CE certified.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is 1.

Q: How is this product packaged?

A: This product is packaged in a wooden box.

Q: What are the payment terms for this product?
A: The payment terms for this product are TT (Telegraphic Transfer).
