Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: TT, T/T
- Supply Ability: 1set/week

Product Specification

- Product Name: Liquid Filling And Capping Machine Semi Automatic Filling And Capping Machine Filling Volume 5-100ml 220V/50Hz
- Filling Volume: 5-100ml
- Filling Accuracy: $\pm 1\%$
- Power Supply: 220V/50Hz
- Filling Method: Semi-automatic
- Air Consumption: $0.1\text{m}^3/\text{min}$
- Capping Method: Semi-automatic
- Air Pressure: 0.4-0.6MPa
- Highlight: Liquid semi automatic filling and capping machine
,
0.6MPa semi automatic filling and capping machine

Product Description

Liquid Filling And Capping Machine Semi Automatic Filling And Capping Machine Filling Volume 5-100ml 220V/50Hz

Product Description:

Our Semi-automatic Filling and Capping Machine is a top-of-the-line product that boasts an impressive capping speed of 20-40 bottles per minute. This means that you can fill and cap a large number of products in a short amount of time, increasing your production efficiency and output.

This machine is equipped with a power supply of 220V/50Hz, ensuring that it is compatible with most industrial power sources. It also requires an air pressure of 0.4-0.6MPa, which is a standard requirement for filling and capping machines. The air consumption of this machine is 0.1m³/min, making it an energy-efficient option for your production line.

The filling method used in this Semi-automatic Filling and Capping Machine is semi-automatic, which means that it requires manual placement of the bottles and removal of the filled and capped bottles. This method is perfect for small to medium-sized production lines where a fully automatic liquid filling machine may not be necessary.

The machine is designed to be easy to use and maintain, with a simple interface that allows for quick and easy adjustments to the filling and capping settings. It is also made from high-quality materials, ensuring that it is durable and long-lasting.

In conclusion, if you are looking for an efficient and reliable filling machine for your production line, our Semi-automatic Filling and Capping Machine is the perfect choice. Its impressive capping speed, energy efficiency, and ease of use make it a top-of-the-line product that will help improve your production process. Get your hands on this Automatic Liquid Filling Machine today and experience the difference it can make in your production line!

Technical Parameters:

Capping Method	Semi-automatic
Filling Volume	5-100ml
Capping Speed	20-40 Bottles/min
Air Pressure	0.4-0.6MPa
Material	Stainless Steel
Air Consumption	0.1m ³ /min
Filling Method	Semi-automatic
Power Supply	220V/50Hz
Filling Accuracy	±1%

This table shows the technical parameters of a Semi-automatic Filling Capping Machine. This is an Automatic Filling and Packing Machine that has a filling volume of 5-100ml. The capping speed is 20-40 bottles per minute and the machine operates at an air pressure of 0.4-0.6MPa. The machine is made of Stainless Steel and has an air consumption of 0.1m³/min. The filling method used is Semi-automatic and the power supply is 220V/50Hz. The machine has a filling accuracy of ±1%.

Applications:

This filling machine is an ideal choice for businesses that require an automatic liquid filling machine that can handle large quantities of liquid quickly and efficiently. Its semi-automatic capping method is perfect for businesses that need a more hands-on approach to their packaging process. The machine is designed to handle a variety of liquids, including water, oil, and other types of liquid products. The 20L semi-automatic capping filling machine is perfect for use in a variety of different scenarios. It can be used in small production facilities, such as those found in small businesses, or in larger facilities that require a more automated approach to their packaging process. The machine is also suitable for use in laboratories and research facilities that require a reliable and efficient way to fill and cap containers with liquid products.

Due to its compact size and semi-automatic capping and filling methods, the 20L semi-automatic capping filling machine is perfect for businesses that have limited space and require a machine that can be easily moved around. It can be used in a variety of different applications, including food and beverage production, cosmetics and personal care production, and pharmaceutical production. Overall, if you are looking for an automatic filling and packing machine that is reliable, efficient, and easy to use, the 20L semi-automatic capping filling machine is an excellent choice. With its CE certification and semi-automatic capping and filling methods, it is a great investment for businesses that require a more hands-on approach to their packaging process. Its air pressure of 0.4-0.6MPa and air consumption of 0.1m³/min make it a suitable choice for businesses looking for an efficient and cost-effective solution for their packaging needs.

Customization:

Customize your 20L semi-automatic capping filling machine with our product customization services. Our machine comes with CE certification and can be ordered in quantities as low as 1. The filling accuracy is $\pm 1\%$ and capping speed ranges from 20-40 bottles/min. The air pressure required is 0.4-0.6MPa and capping method is semi-automatic. Additionally, the filling volume can be customized from 5-100ml.

With our customizations, you can turn your semi-automatic capping filling machine into an Automatic Liquid Filling Machine or Automatic Filling And Packing Machine. Contact us today to learn more about our customization services.

Support and Services:

The semi-automatic filling and capping machine is a reliable and efficient solution for filling and capping a variety of liquids, creams, and gels. Our technical support and services include:

- Installation and setup guidance to ensure proper use of the machine

- Training for operators to maximize productivity and minimize downtime

- Maintenance and repair services to keep the machine running smoothly

- Remote technical support to quickly address any issues or questions

- Customization options to meet specific product and production needs

Our team of experts is dedicated to providing exceptional support and service to ensure your semi-automatic filling and capping machine operates at peak performance.

Packing and Shipping:

Product Packaging:

Semi-automatic filling and capping machine
Protective foam and plastic wrapping
Instruction manual
Shipping:
Ships within 1-2 business days
Shipping method: UPS ground
Shipping cost: Calculated at checkout

FAQ:

Here are the frequently asked questions and answers for the Liquid Filling And Capping Machine Semi Automatic Filling And Capping Machine Filling Volume 5-100ml 220V/50Hz

Q: What is the brand name of this filling and capping machine?

A: The brand name of this machine is 20L semi-automatic capping filling machine.

Q: Does this machine have any certification?

A: Yes, this machine is certified with CE.

Q: What is the minimum order quantity for this machine?

A: The minimum order quantity for this machine is 1.

Q: Is this machine suitable for filling and capping different types of liquids?

A: Yes, this machine is suitable for filling and capping different types of liquids, including water, juice, oil, and more.

Q: Does this machine require any special training to operate?

A: No, this machine is easy to operate and does not require any special training.
