

20-40 Bottles/Min Stainless Steel Filling And Capping Machine Liquid Filling And Capping Machine

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: T/T, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: 20-40 Bottles/Min Stainless Steel Filling And Capping Machine Liquid Filling And Capping Machine
- Air Pressure: 0.4-0.6MPa
- Material: Stainless Steel
- Filling Accuracy: $\pm 1\%$
- Air Consumption: 0.1m³/min
- Filling Volume: 5-100ml
- Power Supply: 220V/50Hz
- Capping Speed: 20-40 Bottles/min
- Highlight: semi automatic filling and capping machine
ISO9001
,
SS304 semi automatic filling and capping machine

Product Description

20-40 Bottles/Min Stainless Steel Filling And Capping Machine Liquid Filling And Capping Machine

Product Description:

The machine is equipped with a powerful 220V/50Hz power supply, which ensures that it can operate efficiently and effectively. The Air Pressure required for the machine to function is 0.4-0.6MPa, while the Air Consumption is 0.1m³/min. This ensures that the machine is energy-efficient and can operate for extended periods without any issues.

The Semi-automatic filling and capping machine is designed to provide accurate Filling Accuracy of $\pm 1\%$, ensuring that your products are filled to the correct level, reducing waste and increasing efficiency. The machine can be adjusted to fill different can sizes, making it a versatile and reliable Automatic Liquid Filling Machine.

The machine is easy to operate and maintain, making it ideal for small and medium-sized businesses. The filling and capping process is semi-automatic, meaning that the operator needs to place the can under the filling nozzle and press the foot pedal to start the filling process. The machine will automatically stop filling once the can is full and will then proceed to cap the can, ensuring that the product is sealed correctly.

In conclusion, the Semi-automatic filling and capping machine is an excellent investment for businesses looking for a reliable and efficient way to fill and cap cans with liquids. The machine is made of high-quality Stainless Steel material, making it durable and long-lasting. The machine is easy to operate and maintain, making it ideal for small and medium-sized businesses. The machine provides accurate Filling Accuracy of $\pm 1\%$, ensuring that your products are filled to the correct level, reducing waste and increasing efficiency. The machine is energy-efficient, with a power supply of 220V/50Hz, Air Pressure of 0.4-0.6MPa, and an Air Consumption of 0.1m³/min.

Technical Parameters:

Filling Method	Semi-automatic
Air Pressure	0.4-0.6MPa
Filling Volume	5-100ml
Power Supply	220V/50Hz
Capping Speed	20-40 Bottles/min
Air Consumption	0.1m ³ /min
Material	Stainless Steel
Filling Accuracy	$\pm 1\%$
Capping Method	Semi-automatic

Applications:

One of the key features of this machine is its semi-automatic filling method. This means that the operator needs to manually place the container and activate the filling process. The machine then takes over and fills the container with the required amount of liquid. This process ensures that the filling is accurate and consistent, which is essential for products that require precise measurements. The 20L semi-automatic capping filling machine is made of high-quality stainless steel, making it durable and resistant to corrosion. This also makes it easy to clean and maintain, ensuring that it lasts for many years. The machine requires an air consumption of 0.1m³/min and an air pressure of 0.4-0.6MPa, making it energy efficient and cost-effective. The capping speed of this machine is 20-40 bottles per minute, making it ideal for small to medium-sized production lines. The machine is equipped with a capping mechanism that ensures a tight seal on the container, preventing leaks and spills. This is particularly important for products that need to be transported or stored for long periods. The 20L semi-automatic capping filling machine is suitable for a wide range of applications. It can be used to fill and cap bottles of various sizes and shapes, making it ideal for industries such as food and beverage, pharmaceuticals, cosmetics, and more. Some of the common applications of this machine include filling and capping bottles of juice, milk, water, shampoo, lotion, and other liquids. In summary, the 20L semi-automatic capping filling machine is an excellent investment for any business that needs to improve its production efficiency. It is a reliable and easy-to-use machine that can handle a wide range of applications. With its high-quality materials, energy-efficient operation, and consistent filling and capping capabilities, this machine is a must-have for any business that requires a semi-automatic liquid filling machine.

Customization:

Our customization services offer the flexibility to adapt to your unique requirements, be it an automatic liquid filling machine or can filling machine. The minimum order quantity for this product is 1, so you can order as per your convenience.

Support and Services:

The Semi-automatic filling and capping machine is designed to provide reliable, efficient, and accurate filling and capping of various types of liquids. Our product technical support and services include:

- Initial installation and setup guidance
- Troubleshooting and technical assistance via phone or email
- Regular maintenance and calibration services
- Replacement parts and accessories
- Training for operators and maintenance personnel

Our team of experienced technicians is dedicated to ensuring that your Semi-automatic filling and capping machine operates at its best and meets your production needs. Contact us for any technical support or service needs.

Packing and Shipping:

Product Packaging:

The semi-automatic filling and capping machine product will be packed securely in a sturdy cardboard box.

The box will be labeled clearly with the product name, model number, and other relevant information.

The product will be protected with suitable packaging material to prevent any damage during shipping.

Shipping:

The semi-automatic filling and capping machine product will be shipped through a reputable courier service.

The shipping cost will be calculated based on the destination and weight of the package.

The estimated delivery time will be provided to the customer at the time of purchase.

The customer will receive a tracking number to track the status of their shipment.

FAQ:

20L semi-automatic capping filling machine

2. Q: Is this machine certified? A: Yes, this machine is certified with CE certification

3. Q: What is the minimum order quantity for this machine? A: The minimum order quantity for this machine is 1

4. Q: Is this machine fully automatic or semi-automatic? A: This machine is semi-automatic

5. Q: What are the features of this machine? A: This machine can fill and cap bottles of up to 20L in volume. It is made with high-quality materials and is easy to operate. It also has a compact design for easy storage and transportation.
