Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: 5-100ml Stainless Steel Filling And Capping Machine Rapid 20-40 Bottles/min Capping Speed
- Filling Accuracy: $\pm 1\%$
- Material: Stainless Steel
- Capping Method: Semi-automatic
- Capping Speed: 20-40 Bottles/min
- Filling Method: Semi-automatic
- Air Consumption: 0.1m³/min
- Air Pressure: 0.4-0.6MPa
- Highlight: 20Bottles/min semi automatic filling and capping machine
,
semi automatic filling and capping machine
40Bottles/min

Product Description

5-100ml Stainless Steel Filling And Capping Machine Rapid 20-40 Bottles/min Capping Speed

Product Description:

One of the standout features of this machine is its capping method, which is semi-automatic. This means that the machine will automatically fill the bottles, but the capping process requires some manual input from the operator. This allows for greater control over the capping process, which can be especially important for products that require airtight seals.

The Semi Automatic Filling And Capping Machine is also equipped with a power supply of 220V/50Hz, which provides ample power to run the machine smoothly and efficiently. Additionally, the machine requires an air pressure of 0.4-0.6MPa and has an air consumption of 0.1m³/min. These specifications ensure that the machine runs at optimal levels and produces consistent results.

When it comes to capping speed, the Semi Automatic Filling And Capping Machine is no slouch. It has a capping speed of 20-40 bottles per minute, which makes it a great option for companies that need to fill and cap a large number of bottles quickly. This speed is achieved while maintaining accuracy and precision, which is essential for ensuring that each bottle is filled and sealed correctly.

In terms of versatility, the Semi Automatic Filling And Capping Machine is a great choice. It can be used with a variety of different bottles, making it ideal for companies that produce multiple products or need to switch between different bottle sizes. Plus, it's easy to operate and requires minimal training, which means that companies can get up and running quickly with minimal downtime.

Overall, the Semi Automatic Filling And Capping Machine is a great investment for companies that are in need of an efficient and reliable way to fill and cap their bottles. Its semi-automatic capping method, power supply, air pressure, capping speed, and air consumption make it a standout option in the market of Automatic Filling Machines. Plus, its versatility and ease of use make it a great choice for companies that need a machine that can adapt to their changing needs.

Technical Parameters:

Parameter	Value
Product Name	Semi Automatic Filling And Capping Machine
Power Supply	220V/50Hz
Material	Stainless Steel
Capping Method	Semi-automatic
Air Pressure	0.4-0.6MPa
Filling Method	Semi-automatic
Filling Accuracy	±1%
Filling Volume	5-100ml
Capping Speed	20-40 Bottles/min
Air Consumption	0.1m ³ /min

Applications:

This product is suitable for a wide range of applications and can be used in various scenarios. For instance, it can be used for filling and capping of cosmetic products such as lotions, creams, and perfumes. The semi-automatic filling and capping machine can also be used for filling food products such as sauces, oils, and vinegar. In addition, it is suitable for filling pharmaceutical products such as syrups, suspensions, and emulsions.

The filling method of this product is semi-automatic, which means that it requires some manual intervention. However, it is still an efficient and time-saving option compared to manual filling methods. The air pressure required for the operation of this product is 0.4-0.6MPa. The filling volume of this product ranges from 5-100ml, making it suitable for small to medium-sized products. The product is designed to handle a variety of bottle shapes and sizes, making it a versatile option for different packaging needs. In conclusion, the 20L semi-automatic capping filling machine is a reliable and efficient option for those who require accurate and efficient filling of their products. This product can be used in various application occasions and scenarios, including cosmetic, food, and pharmaceutical industries. With its semi-automatic filling method and stainless steel material, it is a durable and long-lasting option for automatic filling machines.

Customization:

Support and Services:

The Semi Automatic Filling And Capping Machine is a versatile and user-friendly product that is designed to meet the needs of small and medium-sized businesses. It is equipped with advanced features that ensure high accuracy and efficiency in filling and capping processes. The machine is easy to operate and maintain, and it comes with a range of technical support and services to ensure its optimal performance.

Our technical support team is available to assist you with any issues or questions you may have regarding the machine's operation, maintenance, and troubleshooting. We offer comprehensive training programs to help you get the most out of your investment, and we provide regular updates to ensure that your machine stays up-to-date with the latest industry standards and best practices.

In addition to our technical support services, we also offer a range of maintenance and repair services to keep your machine in top condition. Our team of experienced technicians can diagnose and repair any issues that may arise, and we offer scheduled maintenance programs to help prevent problems before they occur.

At our company, we understand the importance of providing top-quality products and services to our customers. That's why we are committed to ensuring that your Semi Automatic Filling And Capping Machine meets your expectations and delivers the performance you need to succeed in your business.

Packing and Shipping:

Product Packaging:

The Semi Automatic Filling and Capping Machine is carefully packaged to ensure safe delivery to our customers. It is first wrapped in bubble wrap and placed in a sturdy cardboard box. The box is then sealed and labeled with the product information and shipping address.

Shipping:

We offer free shipping for the Semi Automatic Filling and Capping Machine to customers within the United States. For international shipping, additional charges may apply. The estimated delivery time is 5-7 business days within the US and 7-10 business days for international orders. Customers will receive a tracking number once the product has been shipped.

FAQ:

Q: What is the brand name of this filling and capping machine?

A: The brand name of this product is 20L semi-automatic capping filling machine.

Q: Is this product certified?

A: Yes, this product is certified with CE certification.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is 1.

Q: Is this machine fully automatic?

A: No, this machine is semi-automatic.

Q: What type of containers can this machine fill and cap?

A: This machine can fill and cap containers with a maximum volume of 20 liters.
