

Stainless Steel FC-2000 Screw Capping Filling Machine 2000Bottles/Hour 0.5m³/Min Air Consumption

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: Stainless Steel FC-2000 Screw Capping Filling Machine 2000 Bottles/Hour 0.5m³/min Air Consumption
- Capping Diameter: 20-50mm
- Material: Stainless Steel
- Model: FC-2000
- Capacity: 2000 Bottles Per Hour
- Air Consumption: 0.5m³/min
- Filling Type: Piston Filling
- Power Supply: 220V/380V, 50Hz/60Hz
- Highlight: **Stainless Steel filling and capping machine, filling and capping machine 2000Bottles/Hour, screw capping machine 0.5m³/min Air**

Product Description

Stainless Steel FC-2000 Screw Capping Filling Machine 2000 Bottles/Hour 0.5m³/min Air Consumption

Product Description:

This Automatic Filling And Packing Machine is a three-in-one machine that performs three critical functions in the bottling process. The machine is a Blowing Filling Capping Machine that is designed to blow, fill, and cap bottles automatically, ensuring that the process is quick, efficient, and accurate. The machine is easy to operate, and it is designed to minimize downtime, reduce waste, and improve productivity.

The Automatic Tube Filling And Sealing Machine is made from high-quality stainless steel, which makes it durable, long-lasting, and easy to clean. The machine is designed to operate in a clean and sterile environment, making it perfect for bottling and packaging of food, beverages, and pharmaceutical products. The machine is easy to maintain and has a low cost of ownership, making it an excellent investment for any business looking to improve its bottling process.

The capping type of the Fully Automatic Filling And Capping Machine is Screw Capping, which is a popular capping method used in the bottling industry. The Screw Capping method ensures that the bottles are tightly sealed, preventing contamination and spillage. The machine is designed to handle different types of caps, making it versatile and adaptable to different bottling needs.

In summary, the Fully Automatic Filling And Capping Machine is a top-of-the-line machine designed to improve the bottling process. The machine is versatile, easy to operate, and has a low cost of ownership. The machine is perfect for small to medium scale production and is ideal for bottling and packaging of food, beverages, and pharmaceutical products. The machine is made from high-quality stainless steel, ensuring that it is durable, long-lasting, and easy to clean. The Screw Capping method used in this machine ensures that the bottles are tightly sealed, preventing contamination and spillage.

Technical Parameters:

Technical Parameters	Values
Model	FC-2000
Capacity	2000 Bottles Per Hour
Capping Type	Screw Capping
Air Pressure	0.6-0.8MPa
Air Consumption	0.5m ³ /min
Power Supply	220V/380V, 50Hz/60Hz
Capping Diameter	20-50mm
Material	Stainless Steel
Filling Type	Piston Filling
Filling Volume	50-1000ml

This is a technical parameter table for the Fully Automatic Filling And Capping Machine, also known as an Automatic Filling And Packing Machine or Automatic Liquid Bottle Filling Machine. It has a capacity of 2000 bottles per hour, uses screw capping, and requires an air pressure of 0.6-0.8MPa and air consumption of 0.5m³/min. The power supply is 220V/380V, 50Hz/60Hz and it can handle capping diameters of 20-50mm. The machine is made of stainless steel and uses piston filling, with a filling volume of 50-1000ml.

Applications:

The FC-2000 model of this Automatic Filling And Packing Machine is made of high-quality Stainless Steel, which makes it durable and long-lasting. It is designed to handle a wide range of filling volumes, from 50-1000ml, making it an ideal choice for businesses that need to fill various volumes of products. The capping diameter of this machine is 20-50mm, making it perfect for capping a wide range of products.

This Automatic Filling And Packing Machine is ideal for use in a variety of industries. It is perfect for businesses that need to fill and cap products quickly and efficiently. Some of the industries that this product is ideal for include the food and beverage industry, pharmaceutical industry, cosmetic industry, and chemical industry.

The Automatic Tube Filling And Sealing Machine is perfect for businesses that need to fill and seal tubes quickly and efficiently. It is designed to handle a wide range of tube sizes, making it an ideal choice for businesses that need to fill and seal tubes of various sizes.

This machine is perfect for use in industries such as the cosmetic industry, pharmaceutical industry, and chemical industry.

The Automatic Powder Filling Machines are perfect for businesses that need to fill and package powder products quickly and efficiently.

These machines are designed to handle a wide range of powder products, making them an ideal choice for businesses that need to package various types of powder products. These machines are perfect for use in industries such as the pharmaceutical industry, food and beverage industry, and chemical industry.

When it comes to payment terms, this product requires TT payment. The air consumption of this machine is 0.5m³/min, making it an efficient choice for businesses that want to save on energy costs. Overall, the 200L IBC fully automatic multi-functional opening, filling and capping production line is a top-of-the-line product that is perfect for businesses that want to increase their production efficiency.

Customization:

In addition to our Automatic Liquid Bottle Filling Machine, we also offer customization services for Automatic Tube Filling And Sealing Machine and Automatic Powder Filling Machines. Contact us today to learn more about how we can customize our products to meet your specific needs.

Support and Services:

The Fully Automatic Filling And Capping Machine is a high-quality product designed to provide fast and efficient filling and capping services to various industries. Our technical support team is available 24/7 to assist with any questions or concerns regarding the product. We offer a range of services to ensure that your Fully Automatic Filling And Capping Machine is running at its optimal level. Our services include installation, training, maintenance, and repair. Our team of experts is highly trained and experienced in providing these services to ensure that your machine is functioning properly and efficiently.

Our technical support and services are designed to ensure that your Fully Automatic Filling And Capping Machine is always running smoothly, reducing downtime and increasing productivity. Trust us to provide the best technical support and services for your machine.

Packing and Shipping:

Product Packaging:

Dimensions: 120cm x 80cm x 150cm

Weight: 300kg

Material: Wooden crate

Shipping:

Delivery method: Sea freight

Delivery time: 30-45 days

Shipping cost: To be determined based on destination

FAQ:

Q: What is the brand name of this product?

A: The brand name is fully automatic multi-functional opening, filling and capping production line.

Q: Is this product certified?

A: Yes, it is CE certified.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity is 1.

Q: How is this product packaged?

A: It is packaged in a wooden box.

Q: What are the payment terms for this product?

A: The payment terms are TT.
