

Efficient Stainless Steel Filling Machine 5-100ml 20-40 Bottles/min Semi automatic Power Supply 220V/50Hz

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: Efficient Stainless Steel Filling Machine 5-100ml 20-40 Bottles/min Semi Automatic Power Supply 220V/50Hz
- Capping Speed: 20-40 Bottles/min
- Filling Volume: 5-100ml
- Power Supply: 220V/50Hz
- Filling Accuracy: $\pm 1\%$
- Material: Stainless Steel
- Air Consumption: 0.1m³/min
- Filling Method: Semi-automatic
- Highlight: 100ml stainless steel filling machine, 100ml filling capping machine stainless steel, 220v stainless steel filling machine

Product Description

Efficient Stainless Steel Filling Machine 5-100ml 20-40 Bottles/min Semi automatic Power Supply 220V/50Hz

Product Description:

The capping speed of this machine is an impressive 20-40 bottles per minute, making it one of the fastest can filling machines in the market. This feature ensures that you can fill and cap your products quickly and efficiently, allowing you to produce more in less time. The power supply of this machine is 220V/50Hz, ensuring compatibility with most power sources. This means that you can use it in your factory or production line without worrying about electricity supply.

The filling volume of this machine ranges from 5-100ml, making it perfect for filling small and medium-sized cans. This feature makes it a versatile machine that can be used to fill a wide range of products, including liquids, creams, and gels.

Our Semi-Automatic Filling and Capping Machine is the perfect alternative to costly and complicated automatic liquid filling machines. It is easy to operate, and the semi-automatic filling method ensures that the filling process is smooth and accurate.

With its fast capping speed, durable stainless steel material, and versatile filling volume, this machine is ideal for small and medium-sized businesses that need an efficient and reliable can filling machine.

Investing in our Semi-Automatic Filling and Capping Machine will save you time, money, and labor in the long run. Don't miss out on this opportunity to streamline your production process and take your business to the next level.

Technical Parameters:

Air Consumption	0.1m ³ /min
Material	Stainless Steel
Air Pressure	0.4-0.6MPa
Power Supply	220V/50Hz
Capping Method	Semi-automatic
Capping Speed	20-40 Bottles/min
Filling Method	Semi-automatic
Filling Volume	5-100ml
Filling Accuracy	±1%

This table shows the technical parameters for the Semi Automatic Filling And Capping Machine product. This machine is considered as one of the Automatic Filling Machines, Filling Capping Machine, and Automatic Filling And Packing Machine.

Applications:

The machine requires an air pressure of 0.4-0.6MPa to operate, and it has a filling accuracy of ±1%. It is ideal for filling liquid products with a volume of 5-100ml. The filling method is automatic, which ensures that the filling process is fast and accurate. The semi-automatic capping method ensures that the capping process is simplified, making it easy to use even for beginners.

The 20L semi-automatic capping filling machine is suitable for a wide range of products, including perfumes, essential oils, and other liquid products. It is an excellent choice for manufacturers who want to increase their productivity and reduce the time it takes to fill and cap their products. This machine is perfect for use in small laboratories, research institutions, and production facilities.

This automatic liquid filling machine is designed to meet the needs of small businesses and startups that require an affordable and efficient filling and capping machine. The machine is easy to operate and maintain, making it an excellent investment for businesses that want to increase their productivity and reduce their labor costs.

Overall, the 20L semi-automatic capping filling machine is a versatile and reliable product that can be used in a variety of industries.

Whether you are a small-scale manufacturer or a laboratory researcher, this automatic filling machine is an excellent choice that will help you increase your productivity and improve the quality of your product.

Customization:

Support and Services:

The Semi Automatic Filling and Capping Machine is a versatile and reliable solution for filling and capping various types of containers. Our technical support team is available to answer any questions you may have regarding the operation or maintenance of the machine.

Our services include:

Installation and setup

Operator training

Regular maintenance and tune-ups

Repairs and replacement of parts

Customization and upgrades

We also offer a range of accessories and spare parts to ensure optimal performance and longevity of the machine. Contact us for more information on how we can support your manufacturing needs.

Packing and Shipping:

Product Packaging:

Machine components will be securely packed in wooden crates

The crates will be strapped and labeled for easy identification

User manual and necessary documents will be included in the package

Shipping:

The product will be shipped via sea or air, depending on the customer's preference and location

Shipping charges will be calculated based on the destination and mode of transportation

The customer will be provided with a tracking number to monitor the status of the shipment

The estimated delivery time will be provided to the customer upon request

FAQ:

Q: What is the brand name of this filling and capping machine?

A: The brand name of this machine is 20L semi-automatic capping filling machine.

Q: Is this machine certified?

A: Yes, this machine is certified with CE.

Q: What is the minimum order quantity for this machine?

A: The minimum order quantity for this machine is 1.

Q: Is this machine suitable for filling and capping liquids?

A: Yes, this machine is suitable for filling and capping liquids.

Q: Is this machine easy to operate?

A: Yes, this machine is designed to be user-friendly and easy to operate.
