Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: Automatic Filling And Capping Machine 50-1000ml Capacity 220V/380V Power Supply 2000 Bottles/hr
- Filling Volume: 50-1000ml
- Capping Diameter: 20-50mm
- Power Supply: 220V/380V, 50Hz/60Hz
- Air Pressure: 0.6-0.8MPa
- Filling Type: Piston Filling
- Capacity: 2000 Bottles Per Hour
- Material: Stainless Steel
- Highlight: Automatic filling and packaging machine, filling and packaging machine 1000ml, 2000Bottles/hr automatic bottle filling and capping machine

Product Description

Automatic Filling And Capping Machine 50-1000ml Capacity 220V/380V Power Supply 2000 Bottles/hr

Product Description:

With a capacity of 2000 bottles per hour, this automatic filling and capping machine can easily handle high-volume production. It is designed with precision and accuracy, ensuring that each bottle is filled with the same amount of product every time. This makes it perfect for businesses that require consistency in their products.

The capping type of this machine is screw capping, which is known for its tight seal and secure closure. This ensures that the product inside the bottle stays fresh and uncontaminated. The screw capping also makes it easy to open and close the bottle, making it convenient for customers to use.

The Fully Automatic Filling And Capping Machine is also equipped with air pressure and air consumption features. It requires an air pressure of 0.6-0.8MPa and consumes 0.5m³/min of air, making it energy-efficient and cost-effective. These features also ensure that the machine operates smoothly and efficiently.

This machine is perfect for businesses that require automatic powder filling machines. It is easy to operate and requires minimal supervision, making it perfect for businesses that need to focus on other aspects of their operations. It is also designed with safety features, ensuring that accidents are avoided during the operation.

In summary, the Fully Automatic Filling And Capping Machine is a top-of-the-line product that is perfect for businesses that require efficient and reliable filling and capping processes. Its high-quality stainless steel material ensures durability and longevity, while its precision and accuracy make it perfect for businesses that require consistency in their products. Its screw capping feature ensures a tight seal and secure closure, keeping the product inside fresh and uncontaminated. Its air pressure and consumption features make it energy-efficient and cost-effective, while its easy operation and safety features make it perfect for businesses that require automatic powder filling machines.

Technical Parameters:

Technical Parameter	Value
Model	FC-2000
Filling Type	Piston Filling
Capping Type	Screw Capping
Material	Stainless Steel
Filling Volume	50-1000ml
Capping Diameter	20-50mm
Air Consumption	0.5m ³ /min
Air Pressure	0.6-0.8MPa
Capacity	2000 Bottles Per Hour
Power Supply	220V/380V, 50Hz/60Hz

Applications:

The automatic multi-functional opening, filling and capping production line is a CE certified product that is perfect for a wide range of product application occasions. This product is perfect for use in industries such as food and beverage, cosmetics, pharmaceuticals, and many more. It is a highly efficient machine that can handle large volumes of products with ease.

The Blowing Filling Capping Machine is an excellent choice for companies that require a high level of automation in their production process. It is a fully automated machine that can open, fill, and cap your products with precision and accuracy. This machine is designed to handle a wide range of products, including liquids, gels, creams, and more.

The Automatic Tube Filling And Sealing Machine is perfect for companies that need to fill and seal tubes quickly and efficiently. This machine is ideal for companies that produce cosmetics, pharmaceuticals, and other products that require a high level of precision and accuracy. It is a fully automated machine that can handle a wide range of tube sizes and product types.

The Filling And Capping Machine is perfect for companies that need to fill and cap products quickly and efficiently. It is a highly efficient machine that can handle a wide range of product volumes, from 50-1000ml. This machine is designed to handle screw capping and can cap products with a diameter of 20-50mm. It requires an air pressure of 0.6-0.8MPa and has an air consumption of 0.5m³/min.

Whether you are a small start-up or a large corporation, the 200L IBC fully automatic multi-functional opening, filling and capping production line is the perfect solution for your production needs. It is designed to be easy to operate and maintain, and comes with a minimum order quantity of 1. It is packaged in a wooden box for safe transport and payment terms are TT.

Customization:

Brand Name: Automatic Filling And Capping Machine 50-1000ml Capacity 220V/380V Power Supply 2000 Bottles/hr

Certification: CE

Minimum Order Quantity: 1

Packaging Details: Wooden Box

Payment Terms: TT

Capping Type: Screw Capping

Model: FC-2000

Capacity: 2000 Bottles Per Hour

Filling Volume: 50-1000ml

Capping Diameter: 20-50mm

Product Attributes: Automatic Tube Filling And Sealing Machine, Automatic Tube Filling And Sealing Machine, Blowing Filling Capping Machine

Support and Services:

The Fully Automatic Filling And Capping Machine is a high-speed, precision filling and capping system designed for use in a variety of industries. It features the latest technology in precision filling and capping, ensuring accuracy and reliability.

Our technical support team is available to assist with any questions or concerns you may have regarding the machine's operation. We also offer a range of services to ensure that your machine is operating at peak performance, including:

Installation and commissioning

Training for operators and maintenance personnel

Preventive maintenance programs

Parts and consumables

Remote technical support

Our goal is to provide you with the highest level of support and service to ensure that your Fully Automatic Filling And Capping Machine is operating at maximum efficiency.

Packing and Shipping:

Product Packaging:

Dimensions: 1200mm x 1000mm x 1500mm
Weight: 300kg
Material: Wooden crate
Shipping Information:
Shipping method: Sea freight
Estimated delivery time: 30-45 days
Shipping cost: To be determined based on destination

FAQ:

Q1: What is the minimum order quantity for Automatic Filling And Capping Machine 50-1000ml Capacity 220V/380V Power Supply 2000 Bottles/hr?

A1: The minimum order quantity for our machine is 1 unit.

Q2: What certifications does the machine have?

A2: Our machine is CE certified, ensuring that it meets European safety, health, and environmental protection standards.

Q3: How is the machine packaged for shipping?

A3: The machine is packaged in a wooden box to ensure its safe transportation and delivery.

Q4: What are the payment terms for purchasing the machine?

A4: Our payment terms are TT, which means payment is made via wire transfer.

Q5: What functions does the machine have?

A5: Our 200L IBC fully automatic filling and capping machine has multiple functions, including opening, filling, and capping. It is a multi-functional production line designed to streamline your manufacturing process.
