

Fully Automatic 2000 Bottles Per Hour Filling Machine With Screw Capping Technology

Our Product Introduction

for more products please visit us on sg-packs.com

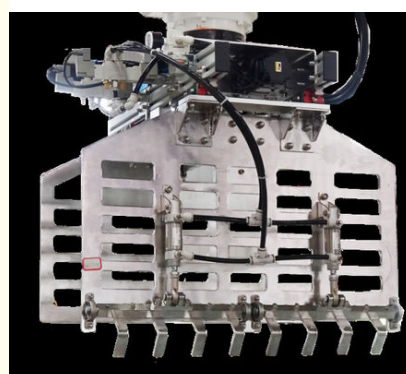

Basic Information

- Brand Name: 200L IBC fully automatic multi-functional opening, filling and capping production line
- Certification: CE
- Minimum Order Quantity: 1
- Packaging Details: wooden box
- Payment Terms: TT

Product Specification

- Capping Type: Screw Capping
- Capacity: 2000 Bottles Per Hour
- Air Consumption: 0.5m³/min
- Power Supply: 220V/380V, 50Hz/60Hz
- Capping Diameter: 20-50mm
- Filling Volume: 50-1000ml
- Model: FC-2000
- Filling Type: Piston Filling
- Highlight: filling machine liquid 2000bottles/hour, filling machine liquid OEM, 2000bottles/hour screw capping equipment

Product Description

Product Description:

This machine is equipped with a screw capping system that ensures the proper sealing of the bottles. This capping type provides a tight and secure seal, which prevents the contents from leaking or spilling. The screw capping system is suitable for different types of bottles, including plastic and glass bottles.

The Automatic Filling And Packing Machine is made of high-quality stainless steel, which ensures the durability and longevity of the machine. The stainless steel material also makes it easy to clean and maintain the machine. This feature ensures the machine's long life span and reduces the likelihood of downtime due to maintenance issues.

The machine requires an air pressure of 0.6-0.8MPa for its operation. This air pressure ensures the smooth and efficient operation of the machine. The machine runs on a power supply of 220V/380V, 50Hz/60Hz, which makes it compatible with different power sources across the globe.

The Blowing Filling Capping Machine can handle a filling volume of 50-1000ml, making it suitable for filling different types of liquids such as water, juice, milk, oil, and other beverages. The machine's filling accuracy ensures that the contents fill each bottle to the correct level, thereby reducing waste and improving efficiency.

The Filling And Capping Machine is fully automatic, which means that it can function without human intervention. This feature reduces labor costs and increases productivity. The machine is also easy to operate, and its user-friendly interface ensures that operators can use it without requiring extensive training.

In summary, the Fully Automatic Filling And Capping Machine is a reliable, efficient, and cost-effective solution for filling and capping different types of liquids. Its screw capping system, stainless steel material, air pressure requirement, power supply, and filling volume make it suitable for different industries. Its automatic and user-friendly features make it easy to operate and maintain, which reduces labor costs and increases productivity.

Technical Parameters:

Technical Parameter	Value
Power Supply	220V/380V, 50Hz/60Hz
Material	Stainless Steel
Capacity	2000 Bottles Per Hour
Filling Volume	50-1000ml
Air Pressure	0.6-0.8MPa
Capping Diameter	20-50mm
Air Consumption	0.5m ³ /min
Filling Type	Piston Filling
Capping Type	Screw Capping
Model	FC-2000

This is a Fully Automatic Filling And Capping Machine, also called Blowing Filling Capping Machine or Automatic Liquid Bottle Filling Machine. It has a filling volume range of 50-1000ml and a capacity of 2000 bottles per hour. The machine is made of stainless steel material and uses piston filling and screw capping mechanisms. It requires an air pressure of 0.6-0.8MPa and has an air consumption of 0.5m³/min. The machine operates on a power supply of 220V/380V, 50Hz/60Hz and has a capping diameter range of 20-50mm. The model number of this machine is FC-2000.

Applications:

The fully automatic filling and capping machine is made of high-quality stainless steel, making it durable and long-lasting. This machine has a capacity of 2000 bottles per hour and can fill volumes ranging from 50-1000ml. The capping type for this machine is screw capping, which is efficient and reliable.

This automatic liquid filling machine is perfect for use in various industries, such as the pharmaceutical, cosmetic, and food industries. It can be used for filling and capping various products, including creams, lotions, gels, and liquids. The machine is easy to operate and can be customized to meet specific customer requirements.

The automatic tube filling and sealing machine is ideal for use in the pharmaceutical and cosmetic industries. It can be used for filling and sealing various types of tubes, including aluminum and plastic tubes. The machine is designed to be efficient and reliable, ensuring that the products are filled and sealed accurately and quickly.

The automatic tube filling and sealing machine is also perfect for use in the food industry. It can be used for filling and sealing various types of food products, including sauces, ketchup, and mayonnaise. The machine is designed to meet the highest hygiene standards and is easy to clean and maintain.

In conclusion, the fully automatic filling and capping machine, along with the automatic tube filling and sealing machine, are versatile products that can be used in various industries. Their high-quality and durability make them reliable and efficient machines that can help businesses increase their production output and improve their overall efficiency. Order now and experience the benefits of these top-of-the-line machines.

Customization:

Automatic Liquid Bottle Filling Machine, we present our **Fully Automatic Filling And Capping Machine**. This

Blowing Filling Capping Machine has a capacity of **2000 Bottles Per Hour** and can fill volumes from **50-1000ml** with **Screw Capping** technology. Made from **Stainless Steel** material, this **Filling And Capping Machine** has a model number of **FC-2000** . It is CE certified and comes in **wooden packaging boxes** . Minimum order quantity is **1** and payment terms are **TT** . Contact us for further customization options for this **200L IBC fully automatic multi-functional opening, filling and capping production line** .

Support and Services:

Our Fully Automatic Filling And Capping Machine is designed to provide efficient and reliable performance for your filling and capping needs. Our technical support and services include:

Installation and setup assistance

Training for operators and maintenance personnel

24/7 phone and email support

On-site repair and maintenance services

Remote monitoring and diagnostic services

Customized maintenance and service plans

We are committed to ensuring the smooth operation of your machine and providing prompt and professional technical support whenever you need it.

Packing and Shipping:

Product Packaging:

Dimensions: 1200mm x 800mm x 1800mm

Weight: 400kg

Packaging Material: Wooden Crate

Shipping:

Shipping Method: Sea Freight

Port of Loading: Shanghai, China

Port of Destination: [Insert Port Name Here]

Estimated Delivery Time: 30 days

Shipping Cost: [Insert Cost Here]

FAQ:

Q: What is the brand name of the filling and capping machine?

A: The brand name of the filling and capping machine is 200L IBC fully automatic multi-functional opening, filling and capping production line.

Q: Is the filling and capping machine certified?

A: Yes, the filling and capping machine is certified with CE.

Q: What is the minimum order quantity for the filling and capping machine?

A: The minimum order quantity for the filling and capping machine is 1.

Q: How is the filling and capping machine packaged?

A: The filling and capping machine is packaged in a wooden box.

Q: What are the payment terms for the filling and capping machine?

A: The payment terms for the filling and capping machine are TT.
