Automatic Stainless Steel Filling Capping Machine 220V 380V 0.5m3 Air Consumption 50 -1000ml

Basic Information

• Brand Name: 200L IBC fully automatic multi-functional

opening, filling and capping production line

Certification: CE

 Minimum Order Quantity: 1

Packaging Details: wooden box

Payment Terms: TT

Product Specification

Power Supply: 220V/380V, 50Hz/60Hz

• Air Consumption: 0.5m³/min

Material: Stainless Steel

• Filling Volume: 50-1000ml

• Air Pressure: 0.6-0.8MPa

Capacity: 2000 Bottles Per Hour

Filling Type: Piston FillingCapping Type: Screw Capping

• Highlight: 0.5m3/min filling and packaging machine,

Piston Filling filling and packaging machine,

bottle filling and capping machine

Product Description:

The FC-2000 Automatic Liquid Bottle Filling Machine is equipped with a piston filling system that ensures accurate and consistent filling every time. With a filling range of 50ml to 1000ml, this machine is ideal for filling a wide range of products, including oils, juices, sauces, and more.

This Automatic Filling And Packing Machine is easy to operate and maintain, with a user-friendly interface that allows for quick and easy adjustments. The machine is equipped with a touch screen control panel that displays all the necessary information, including filling volume, filling speed, and more.

The FC-2000 Fully Automatic Filling And Capping Machine is built to last, with high-quality materials and components that ensure reliable and efficient performance. The machine is powered by a 220V/380V, 50Hz/60Hz power supply, and requires an air pressure of 0.6-0.8MPa and an air consumption of 0.5m³/min to operate.

This Automatic Liquid Filling Machine is also equipped with a capping system that can handle a variety of caps, including screw caps, press caps, and more. The capping system is fully automatic and ensures a tight and secure seal every time.

In conclusion, the FC-2000 Fully Automatic Filling And Capping Machine is the perfect solution for your liquid filling and packing needs. With its piston filling system, user-friendly interface, and high-quality components, this Automatic Filling And Packing Machine is sure to exceed your expectations.

Technical Parameters:

Capping Diameter	20-50mm
Air Consumption	0.5m³/min
Filling Volume	50-1000ml
Power Supply	220V/380V, 50Hz/60Hz
Air Pressure	0.6-0.8MPa
Model	FC-2000
Material	Stainless Steel
Filling Type	Piston Filling
Capacity	2000 Bottles Per Hour
Capping Type	Screw Capping

Applications:

The Fully Automatic Filling And Capping Machine is a great product that can be used in various occasions and scenarios. Some of the common application occasions include food and beverage production plants, pharmaceutical factories, cosmetic manufacturing plants, and other industries that require automatic filling and capping of liquids.

One of the unique features of this product is its ability to fill a wide range of volumes, from 50-1000ml, making it suitable for filling and capping different types of liquids, such as juice, milk, honey, shampoo, and lotion. The product is also easy to use, making it a great option for both small and large-scale businesses.

The Fully Automatic Filling And Capping Machine is designed to enhance productivity and efficiency in the production process. It is a great investment for businesses that want to streamline their production process and reduce labor costs. This product eliminates the need for manual filling and capping, and it can fill and cap up to 2000 bottles per hour, depending on the size of the bottles.

The minimum order quantity for this product is 1, and it comes in a wooden box packaging. The payment terms for this product are TT. This product is versatile and can be used in various scenarios, making it a great investment for businesses that require automatic powder filling machines.

Customization:

We offer customization services for our Automatic Filling And Packing Machine to meet your specific needs. The minimum order quantity is 1 and the product will be delivered in a wooden box. Payment terms are TT.

Support and Services:

The Fully Automatic Filling And Capping Machine is a state-of-the-art product that is designed to offer top-quality performance and reliability. Our technical support and services are available to ensure that our customers experience maximum uptime and productivity with our machines.

We provide installation and commissioning services to ensure that the machine is properly set up and ready to use. Our team of experienced technicians will also provide training to the operators to ensure that they can operate the machine efficiently and safely. In addition, we offer preventive maintenance services to ensure that the machine is operating at peak performance and to prevent breakdowns. We also offer repair and replacement services to ensure that any issues are resolved quickly and efficiently. Our technical support team is available 24/7 to provide assistance and guidance whenever it is needed. We also offer remote support services to ensure that issues can be resolved quickly and efficiently.

With our technical support and services, our customers can rest assured that they are getting the best possible performance and reliability from our Fully Automatic Filling And Capping Machine.

Packing and Shipping:

Product Packaging:

Dimensions: 120cm x 80cm x 150cm

Weight: 300kg

Materials: Wood and metal Quantity: 1 piece per package

Shipping:

Shipping Method: Sea or Air

Delivery Time: 15-30 days (depending on location)
Shipping Cost: To be calculated based on destination

FAQ:

- Q: What is the brand name of the product?
- A: The brand name of the product is 200L IBC fully automatic multi-functional opening, filling and capping production line.
- Q: Is the product certified?
- A: Yes, the product is certified with CE.
- Q: What is the minimum order quantity?
- A: The minimum order quantity for this product is 1.
- Q: How is the product packaged?
- A: The product is packaged in a wooden box.
- Q: What are the payment terms for this product?
- A: The payment terms for this product are TT.
