

Semi Automatic Oil Filling Machine Chemical Fertilizer Production

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Features: High Efficiency, Easy Operation, Low Noise
- Weight: 500-1000kg
- Granulation Rate: $\geq 95\%$
- Capacity: 1-10 Tons/hour
- Frequency: 50Hz
- Warranty: 1 Year
- Model: PGS
- Power: 5-30 KW
- Highlight: Chemical Fertilizer Oil Filling Machine, Semi Automatic Oil Filling Machine, Chemical Fertilizer Production Oil Filling Machine

Product Description

Semi Automatic Oil Filling Machine Powder Granulator Series For Chemical Fertilizer Production

Product Description:

The Lube Oil Filling Machine is an innovative solution that is highly efficient and easy to operate. It is equipped with advanced technology that enables it to convert powders into spherical particles with a high degree of accuracy. The machine is designed to operate on a voltage of 380V and has a weight of between 500-1000kg. It is made from high-quality materials that are durable and long-lasting, ensuring that it provides a reliable and efficient service for many years.

This Particle forming granulator has a number of features that make it an ideal choice for many industries. It is easy to operate, making it ideal for use in small to medium-sized companies that do not have the resources to employ a team of experts. It is also highly efficient, which means that it can produce a large volume of high-quality lubricating oil in a short amount of time. Additionally, this machine is designed to operate with low noise levels, which makes it ideal for use in environments where noise levels need to be kept to a minimum. The Lube Oil Filling Machine is a versatile machine that can be used in a wide range of industries. It is ideal for use in the automotive industry, where it is used to produce high-quality lubricating oil for vehicles. It is also used in the industrial sector, where it is used to produce lubricating oil for heavy machinery. Additionally, this machine is used in the construction industry, where it is used to produce lubricating oil for construction equipment.

In conclusion, the Lube Oil Filling Machine is a high-quality powders spheroidization granulator that is a Granulation machinery for powders. It is designed to provide a high degree of efficiency, easy operation, and low noise levels. It is suitable for use in a wide range of industries and is ideal for the production of high-quality lubricating oil. It is made from high-quality materials that are durable and long-lasting, ensuring that it provides a reliable and efficient service for many years. If you are looking for a high-quality Particle forming granulator, then the Lube Oil Filling Machine is the perfect choice for you.

Technical Parameters:

Power	5-30 KW
Dimension	1200*800*1500mm
Application	Pharmaceutical, Chemical, Food, And Other Industries
Warranty	1 Year
Material	Stainless Steel
Particle Size Of Finished Product	0.5-3mm
Granulation Rate	≥95%
Frequency	50Hz
Features	High Efficiency, Easy Operation, Low Noise
Capacity	1-10 Tons/hour

The Lube Oil Filling Machine is a high-quality powder processing granulator. It is part of the powder granulating machine series and powder compaction granulator.

Applications:

The machine is equipped with state-of-the-art powder spheroidization granulator technology, making it an excellent choice for granulation equipment for powders. The granulation rate of this machine is $\geq 95\%$, making it a top-performing powder agglomeration equipment. The 25L lube oil filling production line is ideal for various occasions and scenarios, including small and large-scale production units, pharmaceutical research and development labs, and chemical and food processing industries. The machine is perfect for filling various types of liquids and semi-liquids, including oils, syrups, and creams. This machine is user-friendly, with an automatic filling process that makes it easy to operate. It has a high filling accuracy and a stable filling speed, ensuring that the products are filled precisely and consistently. The machine's advanced features, coupled with its reliability, make it an excellent investment for any business looking to improve its filling process.

Customization:

Customize your 25L lube oil filling production line with our PGS model. Choose your preferred voltage, including 380V, and adjust the particle size of the finished product to your liking, with options ranging from 0.5-3mm. Our machine comes with a 1-year warranty and features high efficiency, easy operation, and low noise. As a powder compaction granulator, our Powder granulating machine series is perfect for your lube oil filling needs.

Support and Services:

The Lube Oil Filling Machine is a high-quality piece of equipment designed to accurately fill various types of lube oils into containers of different sizes and shapes. It is equipped with state-of-the-art technology that ensures precise filling, preventing overfilling or underfilling of containers.

Our technical support team is available to assist with any issues that may arise during the installation, operation, or maintenance of the equipment. We provide thorough training on the proper use of the machine, including how to adjust settings and troubleshoot common problems.

We offer a range of services to ensure the optimal performance of the Lube Oil Filling Machine, including regular maintenance checks and repairs to keep the equipment running smoothly. We also provide spare parts and upgrades to help extend the lifespan of the machine and improve its efficiency.

Our goal is to provide exceptional technical support and services to our customers, helping them get the most out of their investment in the Lube Oil Filling Machine.

Packing and Shipping:

Product Packaging:

The Lube Oil Filling Machine will be packaged in a sturdy wooden crate to ensure safe transportation. The machine will be securely strapped down inside the crate and covered with protective wrapping to prevent any damage during shipping.

Shipping:

We offer worldwide shipping for the Lube Oil Filling Machine. The machine will be shipped via sea or air freight, depending on the customer's preference and location. Shipping costs will vary depending on the destination and shipping method chosen.

FAQ:

Q: What is the capacity of the 25L lube oil filling production line?

A: The production line has a capacity of filling up to 25 liters of lube oil per cycle.

Q: Does the production line come with a capping machine?

A: Yes, the 25L lube oil filling production line comes with a capping machine that can cap the filled containers automatically.

Q: Can the production line fill different types of containers?

A: Yes, the 25L lube oil filling production line can fill various types of containers such as bottles, cans, and barrels.

Q: What is the accuracy of the filling process?

A: The filling accuracy of the 25L lube oil filling production line is $\pm 0.5\%$.

Q: Is the production line easy to operate and maintain?

A: Yes, the 25L lube oil filling production line is designed to be user-friendly and easy to operate and maintain. It comes with a manual and training support to ensure that operators can run the machine effectively and efficiently.
