

380V 50Hz Frequency Powder Granulating Oil Filling Machine Series For Market

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Product Name: 0.5-3mm
- Automatic Grade: Automatic, Semi-Automatic
- Certification: CE
- Type: Filling Machine, vegetable Oil Filling Packaging Machine
- Application: Medical, Chemical
- After-sales Service Provided: Engineers Available To Service Machinery Overseas, Online Support
- Voltage: 220V/110V, 380V
- Warranty: 1 Year
- Highlight: 50Hz Oil Filling Machine, Powder Granulating Oil Filling Machine, 380V Oil Filling Machine

Product Description

Oil Filling Machine 380V 50Hz Frequency Powder Granulating Machine Series For Market

Product Description:

With a power range of 5-30 KW, this machine is capable of handling large quantities of lube oil filling within a short period. It has a capacity of 1-10 Tons/hour, making it an ideal choice for businesses that require high productivity.

The Lube Oil Filling Machine has a model name of PGS and operates at a frequency of 50Hz. It is highly efficient and reliable, ensuring that you get the best value for your investment.

This machine is also versatile, allowing you to use it for various applications. Whether you need to fill lube oil for pharmaceutical, chemical, food, or other industries, the Lube Oil Filling Machine is up to the task.

In addition to lube oil filling, this machine is also capable of powder spheroidization granulation, powder compaction granulation, and other applications. This makes it a highly versatile machine that can meet the needs of different businesses and industries.

The Lube Oil Filling Machine is designed with precision engineering and features high-quality materials. It is easy to operate and maintain, ensuring that you get the best results with minimal effort.

Overall, the Lube Oil Filling Machine is a top-of-the-line machine that is perfect for businesses that require high productivity, efficiency, and versatility. If you are looking for a reliable and efficient lube oil filling machine, this is the perfect choice for you.

Technical Parameters:

Application	Powder granulating machine series: Pharmaceutical, Chemical, Food, And Other Industries
Voltage	380V
Particle Size Of Finished Product	0.5-3mm
Capacity	1-10 Tons/hour
Material	Stainless Steel
Dimension	1200*800*1500mm
Moisture Content Of Raw Material	≤15%
Warranty	1 Year
Weight	500-1000kg
Power	5-30 KW
Product Description	Granulation equipment for powders, Powder compaction granulator

Applications:

The 25L lube oil filling production line is a versatile machine that can be used for a variety of purposes. It is particularly useful for the production of powders and other materials that need to be encapsulated or spheroidized. The machine is equipped with a powder encapsulation machine and a powder spheroidization granulator, which ensures that the final product is of high quality and uniform in size.

The 25L lube oil filling production line has a capacity of 1-10 tons per hour, making it suitable for both small and large-scale production. The particle size of the finished product ranges from 0.5-3mm, which makes it ideal for a wide range of applications.

The machine is easy to operate and maintain, and comes with a variety of features that make it highly efficient and reliable. It is equipped with granulation machinery for powders, which ensures that the granulation process is smooth and consistent.

The 25L lube oil filling production line is perfect for use in a variety of occasions and scenarios, including the production of pharmaceuticals, chemicals, food products, and other materials. It is a highly versatile machine that can be used for a variety of purposes, and is capable of producing high-quality products quickly and efficiently.

Customization:

Brand Name: 25L lube oil filling production line

Model: PGS

Granulation Rate: $\geq 95\%$ with Powder Granulator Series

Capacity: 1-10 Tons/hour with Powder Compaction Granulator

Power: 5-30 KW

Material: Stainless Steel with Powder Granulator Series

Support and Services:

The Lube Oil Filling Machine is a high-quality, automated system designed to accurately fill containers with lubricating oil. Our product technical support and services include:

1. Installation and commissioning: Our team of experts will ensure that the machine is installed and commissioned properly, ensuring that the machine works optimally from the start.
2. Training: We provide comprehensive training to operators and maintenance personnel to ensure that they can operate and maintain the machine effectively.
3. Maintenance and repair: We offer maintenance and repair services to ensure that the machine continues to function optimally and downtime is minimized.
4. Spare parts: We provide genuine spare parts to ensure that the machine operates at its best for an extended period of time.
5. Technical assistance: Our technical support team is available to provide assistance and answer any technical queries that customers may have about the machine.

Packing and Shipping:

The Lube Oil Filling Machine is carefully packaged to ensure safe delivery. The machine is wrapped in protective materials and placed in

a sturdy cardboard box. The box is then sealed securely to prevent any damage during shipping. We offer free standard shipping to all locations within the United States. For international orders, shipping rates may vary depending on the destination. Once your order is processed, you will receive a confirmation email with tracking information so you can keep an eye on your package and know when to expect delivery.

FAQ:

Q: What is the brand name of the lube oil filling machine?

A: The brand name of this machine is 25L lube oil filling production line.

Q: What is the capacity of the machine?

A: The machine has a capacity of filling up to 25 liters of lube oil at a time.

Q: What type of lube oil can be filled using this machine?

A: This machine is designed to fill various types of lube oil, including engine oil, hydraulic oil, gear oil, and more.

Q: Is this machine suitable for small-scale or large-scale production?

A: This machine is suitable for both small-scale and large-scale production, depending on your production needs and requirements.

Q: Does this machine require any special training to operate?

A: This machine is easy to operate and does not require any special training. However, we recommend that you read the user manual carefully before operating the machine.
