

Durable Stainless Steel Powder Processing Granulator Lube Oil Filling Machine For 10-30kg Output

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG20FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 10per year

Product Specification

- Product Name: Lube Oil Filling Machine Durable Stainless Steel Powder Processing Granulator For 10-30kg Output
- Automatic Grade: Automatic, Semi-Automatic
- Certification: CE
- Weight: 800kg
- Driven Type: Electric, Mechanical
- Dimension(l*w*h): Custommized
- Type: Filling Machine, vegetable Oil Filling Packaging Machine
- Application: Medical, Chemical
- Voltage: 220V/110V, 380V
- Warranty: 1 Year

Product Description

Lube Oil Filling Machine Durable Stainless Steel Powder Processing Granulator For 10-30kg Output

Product Description:

One of the key features of this product is its ability to produce finished products with a particle size of 0.5-3mm. This is achieved through the use of a powder spheroidization granulator, which is a type of particle forming granulator that is designed to create uniform, spherical particles. This ensures that the lube oil is dispensed consistently, reducing the risk of spills and other accidents.

The Lube Oil Filling Machine is also equipped with a powerful motor that operates on 380V and consumes between 5 and 30 KW of power, depending on the specific model. This allows it to operate efficiently and with minimal downtime, which is crucial in a fast-paced production environment.

In addition to its technical features, the Lube Oil Filling Machine is also designed with user-friendliness in mind. Its intuitive interface allows operators to easily adjust settings, while its durable construction ensures that it can withstand the rigors of continuous use.

Overall, the Lube Oil Filling Machine is an excellent choice for businesses that require a reliable and efficient system for filling lube oil. Its compact size, particle forming granulator technology, and powerful motor make it an ideal solution for small to medium-sized facilities.

Technical Parameters:

Capacity	1-10 Tons/hour
Power	5-30 KW
Material	Stainless Steel
Application	Pharmaceutical, Chemical, Food, And Other Industries
Weight	500-1000kg
Voltage	380V
Warranty	1 Year
Granulation Rate	≥95%
Moisture Content Of Raw Material	≤15%
Frequency	50Hz

This product can be referred to as a powder compaction granulator, powder processing granulator, or powder encapsulation machine.

Applications:

This lube oil filling machine is suitable for various industries including pharmaceutical, chemical, food, and other industries. It can be used to fill different types of lube oils with varying viscosities, making it a versatile machine. The machine is designed to perform various functions such as powder compaction granulator, powder spheroidization granulator, and powder spheroidization granulator.

The machine can be used in different production scenarios. For instance, in the pharmaceutical industry, the product can be used to fill lube oil into containers used in the production of medicines. In the chemical industry, the machine can be used to fill lube oil used in the production of chemicals. In the food industry, the machine can be used to fill lube oil used in the production of food products.

The machine is also suitable for use in different production occasions. For example, it can be used in a small-scale production setup, such as a laboratory, where a limited amount of lube oil is required. It can also be used in a large-scale production setup where a significant amount of lube oil is required. The machine is designed to fill lube oil accurately and efficiently, ensuring that the production process runs smoothly.

Customization:

Customize your 25L lube oil filling production line with our product customization services. Our PGS model can be tailored to your specific needs, including:

Capacity options ranging from 1-10 Tons/hour

Weight variations between 500-1000kg

Particle size of finished product ranging from 0.5-3mm

Made with high-quality stainless steel material

Looking for granulation machinery for powders? Our powder granulator series is the perfect solution for your production needs. Need a powder encapsulation machine? Let us customize our PGS model to fit your requirements. Contact us today to learn more.

Support and Services:

Our Lube Oil Filling Machine product comes with comprehensive technical support and services to ensure smooth and efficient operation. Our team of experienced technicians are available to answer any questions or concerns you may have regarding the installation, operation, and maintenance of the machine. We also offer training services to ensure that your staff is properly trained on how to operate and maintain the machine for optimal performance. In addition, we provide troubleshooting services to assist in identifying and resolving any issues that may arise during operation. Our goal is to provide exceptional support and services to ensure that your Lube Oil Filling Machine operates at peak performance and efficiency.

Packing and Shipping:

Product Packaging:

Machine will be packed in a wooden crate to ensure safe transportation.

All necessary accessories and parts will be properly secured and packed.

Packaging will be done in compliance with international standards to ensure safe delivery.

Shipping:

We offer worldwide shipping for the Lube Oil Filling Machine.

Once the order is confirmed, the machine will be shipped within 3-5 working days.

Shipping time will vary depending on the destination. Estimated delivery time will be provided upon request.

We will arrange for the shipping and provide all necessary documentation for customs clearance.

FAQ:

Q: What is the brand name of the lube oil filling machine?

A: The brand name of our lube oil filling machine is 25L lube oil filling production line.

Q: What is the maximum filling capacity of the machine?

A: The maximum filling capacity of our lube oil filling machine is 25 liters.

Q: What is the power requirement for this machine?

A: The power requirement for our lube oil filling machine is 380V/50Hz, 3 phase.

Q: Can this machine be used for filling other liquids besides lube oil?

A: Yes, our lube oil filling machine can be used for filling other liquids that have similar viscosity and characteristics as lube oil.

Q: Is the filling process automatic or manual?

A: Our lube oil filling machine is a fully automatic machine that can fill, cap, and label the bottles without any manual intervention.
