# Automatic Big Capacity 1000 Bottles/Hour Chemical Filling Machine

## **Basic Information**

Place of Origin: CHINABrand Name: SGCertification: CE

Model Number: SG200F-A

Minimum Order
 Quantity:

Price: 10000usdPackaging Details: wooden boxDelivery Time: 3months

• Payment Terms: T/T, L/C, D/A, D/P

1

• Supply Ability: 1set/week

# **Product Specification**

Product Name: Automatic Filling Machine, Automatic

Chemicals Filling Machine With Capacity

1000 Bottles/Hour

Voltage: 220V,380V/50HZ

Automatic Grade: Automatic, Semi-Automatic

• Weight: 500Kg

• Driven Type: Electric, Hydraulic

Power: 3HP 380V 50HZ(or As The Client Request)

• Dimension(I\*w\*h): 1300\*3000\*1200 Mm And 2300\*2800\*1400

Mm

Application: Machinery & Hardware, Medical

Certification: CEWarranty: 1 Year

# **Product Description**

Automatic Filling Machine, Automatic Chemicals Filling Machine With Capacity 1000 Bottles/Hour

# **Product Description:**

The Automatic Chemicals Filling Machine is an ideal choice for companies looking to minimize labor costs and improve production efficiency. This machine is fully automatic and can fill up to 1000 bottles per hour, making it perfect for high-volume applications. Its high-accuracy filling mechanism ensures that each bottle is filled with the precise amount of liquid, with a filling accuracy of ±0.5%. With its advanced technology and user-friendly design, the Automatic Chemicals Filling Machine is easy to operate and maintain. Its compact size and simple structure make it suitable for use in a variety of settings, from small workshops to large factories. Whether you are in the pharmaceutical, chemical, or other related industries, the Automatic Chemicals Filling Machine is an essential tool for your production line. Its high precision, automatic operation, and durable construction make it a reliable and efficient option for filling chemicals into bottles.

The AFM-1000 model of the Automatic Chemicals Filling Machine is a top-of-the-line option that provides even greater precision and efficiency. With its advanced control system and high-speed filling mechanism, this model can fill up to 1000 bottles per hour with an accuracy of ±0.5%, making it ideal for high-volume production lines. Its stainless steel construction ensures durability and longevity, while its user-friendly design makes it easy to operate and maintain.

#### Features:

Product Name: Automatic Chemicals Filling Machine

Bottle Type: Round/Square/Oval Filling Volume: 25L-200L Material: Stainless Steel Application: Chemicals Air Pressure: 0.6-0.8Mpa

#### **Technical Parameters:**

| Air Pressure      | 0.6-0.8Mpa        |
|-------------------|-------------------|
| Power Consumption | 1.5KW             |
| Capacity          | 1000 Bottles/hour |
| Material          | Stainless Steel   |
| Filling Nozzle    | 4                 |
| Bottle Type       | Round/Square/Oval |
| Model             | SG200F-A          |
| Application       | Chemicals         |
| Control System    | PLC               |
| Touch Screen      | 7 Inch            |

#### **Applications:**

The machine is made of high-quality stainless steel which makes it durable and long-lasting. The stainless steel material also makes it easy to clean and maintain. The machine is equipped with a PLC control system which ensures accurate and efficient filling of chemicals. The control system is easy to operate and can be programmed to adjust the filling speed and volume according to the specific requirements of the user.

The Automatic Chemicals Filling Machine is ideal for use in various industries such as the chemical, pharmaceutical, and food industries. The machine can be used for filling various types of chemicals such as liquid detergents, antifreeze, and other similar products. The machine is also suitable for use in small and medium-sized production lines. It can be used for filling bottles, cans, and other containers with a capacity of up to 1000 ml. The machine has a maximum filling speed of 40 bottles per minute which makes it ideal for use in high-speed production lines.

The Automatic Chemicals Filling Machine is also suitable for use in various scenarios such as filling stations, factories, and warehouses. The machine is designed to operate quietly and efficiently which makes it suitable for use in areas where noise levels need to be kept to a minimum. The machine has an air consumption of 0.6m³/min which makes it energy-efficient and cost-effective to operate. The AFM-1000 model of the Automatic Chemicals Filling Machine is a high-quality and reliable machine that can be used for various applications. With its efficient PLC control system, touch screen interface, and durable stainless steel material, the machine is ideal for use in various industries and scenarios. Whether you need to fill bottles, cans, or other containers with chemicals, the Automatic Chemicals Filling Machine is the perfect solution for your needs.

#### **Customization:**

Customize your Automatic Chemicals Filling Machine to fit your specific needs. Our machine comes with a 7-inch touch screen, allowing for easy operation and monitoring. With a capacity of 1000 bottles per hour, our machine ensures maximum efficiency. The machine is made of high-quality stainless steel, ensuring durability and longevity. The air consumption of the machine is only 0.6m³/min, making it energy-efficient. Our Chemicals Filling Machine is designed for use in the chemical industry and is fully automatic, ensuring accuracy and consistency in every fill.

#### **Support and Services:**

The Automatic Chemicals Filling Machine product comes with comprehensive technical support and services to ensure optimal performance and uptime. Our team of expert technicians is available to assist with installation, training, and troubleshooting to minimize downtime and maximize productivity. Additionally, we offer ongoing maintenance and repair services to keep your filling machine operating at peak efficiency. Our technical support and services are designed to provide you with peace of mind and ensure that your investment in our product delivers the results you need.

#### Packing and Shipping:

Product Packaging:

Dimensions: 1200cm x 1800cm x 1300cm

Weight: 900kg Material: Wooden crate

Contents: Automatic Chemicals Filling Machine, user manual, spare parts

Shipping:

Shipping method: Sea freight Delivery time: 30-35 days

Shipping cost: To be determined based on destination

Packaging: Wooden crate Insurance: Included
