

## Good Looking Semi Automatic Bottle Filling Machine With Stainless Steel And 2-24 Head

Our Product Introduction

for more products please visit us on sg-packs.com

### Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG20F
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

### Product Specification

- Warranty: 1 Year
- Color: White
- Operation: Semi-automatic
- Appearance: Good-looking
- Head: 2~24
- Power Supply: 220V/50Hz
- Meterial: Stainless Steel
- Bottle Height: 50-300mm
- Highlight: 2Head semi automatic bottle filling machine,  
Stainless semi automatic bottle filling machine,  
24Head semi automatic bottle filling machine

## Product Description

### Good looking Semi automatic Bottle Filling Machine With Stainless Steel And 2-24 Head

#### Product Description:

This semi-automatic machine is designed to make the filling process as efficient and easy as possible. With a head range of 2-24, it can handle a wide variety of container sizes, making it a versatile addition to any production line. The machine operates using AC 380V, 50Hz voltage, making it compatible with most industrial power supplies.

The Automatic IBC Filling Machine comes with a 1-year warranty, giving you peace of mind and ensuring that you get the most out of your investment.

One of the standout features of this machine is its lid tightening capabilities. It comes equipped with a Lid Tightening Machine that ensures a secure and tight seal on all containers. This is particularly important for liquid products that need to be transported without leakage or spillage.

In addition to its filling and lid tightening capabilities, the Automatic IBC Filling Machine can also be used as a Screw Cap Machine. This function allows you to quickly and easily seal containers with screw caps, making it ideal for a wide range of products.

And if you need even more versatility, the Automatic IBC Filling Machine can also be used as a Jar Capper Machine. This function allows you to cap jars with ease, making it a great addition to any production line that deals with jarred products.

Overall, the Automatic IBC Filling Machine is a reliable and efficient solution for filling large containers with liquid products. With its durable construction, semi-automatic operation, and versatile capabilities, it is sure to become an essential part of your production line.

#### Technical Parameters:

Manual	English Version
Material	Stainless Steel
Voltage	AC 380V,50Hz
Usage	Plastic Or Glass Bottle Capping
Head	2~24 (including Flip-Off Capping Unit, Jar Capper Machine, and Rotary Capping Device)
Warranty	1 Year
Power Supply	220V/50Hz
Appearance	Good-looking
Capping Speed	700.~1000pcs
Bottle Height	25L-200L

#### Applications:

One of the main applications of the Servo Tracking Capping Machine is in the pharmaceutical industry. It is capable of capping different types of containers such as vials, bottles, and jars. The machine is equipped with a Rotary Capping Device that ensures a tight seal on the containers to prevent contamination. This feature makes it ideal for filling and capping liquid and powder medicines.

Another application of the Servo Tracking Capping Machine is in the food processing industry. The machine is designed to handle different types of food containers such as jars, bottles, and cans. It is equipped with a Jar Capper Machine that ensures a tight seal on the containers, which is important for preserving the freshness and quality of the food. This feature makes it ideal for filling and capping food products such as jams, sauces, and pickles.

The Servo Tracking Capping Machine is also ideal for use in the chemical industry. It is capable of filling and capping different types of chemical containers such as bottles, jars, and drums. It is equipped with a Flip-Off Capping Unit that ensures a tight seal on the

containers, which is important for preventing spills and leaks. This feature makes it ideal for filling and capping chemical products such as solvents, acids, and detergents.

The Servo Tracking Capping Machine is a good-looking machine that is designed to complement the aesthetics of the environment it is used in. It is easy to operate, and its semi-automatic operation ensures that it can be used by both skilled and unskilled operators. The machine comes with a 1-year warranty, which gives users the confidence that they are investing in a reliable and durable capping machine.

## Customization:

## Support and Services:

The Automatic IBC Filling Machine is a high-quality and reliable product designed to streamline the filling process of intermediate bulk containers (IBCs) with liquids, powders, or granules. It features a user-friendly interface that allows for easy operation and control, as well as a sturdy construction that ensures long-lasting performance even in demanding environments.

Our product technical support and services for the Automatic IBC Filling Machine include:

Installation and setup assistance

Training and education on how to use the machine effectively and safely

Regular maintenance and repair services to ensure optimal performance

Replacement parts and accessories to keep the machine running smoothly

Technical troubleshooting and support to address any issues that may arise

Our team of experienced technicians and support staff is dedicated to providing top-notch service and support to our customers, ensuring that they get the most out of their investment in our Automatic IBC Filling Machine. Contact us today to learn more.

## Packing and Shipping:

Product Packaging:

Heavy-duty wooden crate

Protective foam lining

Securely strapped and wrapped

Shipping:

Ships via sea or air freight

International shipping available

Delivery within 30-45 days of order confirmation
