

Experience Seamless Process Chemicals Automatic Tube Filling Machine 1.5KW

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Filling Accuracy: $\pm 0.5\%$
- Bottle Type: Round/Square/Oval
- Power Consumption: 1.5KW
- Model: AFM-1000
- Power Supply: 220V/50Hz
- Air Pressure: 0.6-0.8Mpa
- Control System: PLC
- Voltage: 220V, 380V/50HZ
- Automatic Grade: Automatic, Semi-Automatic
- Highlight: Seamless Process automatic tube filling machine

Product Description

Experience Seamless Filling Process With Automatic Chemicals Filling Machine Automatic Tube Filling Machine

Product Description:

The Automatic Chemicals Filling Machine is designed to be easy to operate. It features a user-friendly interface that allows operators to set up the machine quickly and easily. The machine is equipped with a digital control system that monitors and adjusts the filling process to ensure that it is accurate and consistent.

One of the key features of the Automatic Chemicals Filling Machine is its power consumption. The machine only requires 1.5KW of power to operate, which makes it an energy-efficient option for filling chemicals. This makes it an ideal choice for businesses that want to reduce their energy costs and minimize their environmental impact.

The Automatic Chemicals Filling Machine is equipped with four filling nozzles, which allows for quick and efficient filling of chemicals. This means that businesses can fill more products in less time, which can help to increase their productivity and profits. The filling nozzles are also designed to be durable and long-lasting, which means that they can withstand the harsh conditions of a chemical manufacturing environment.

Air consumption is another important consideration when it comes to filling machines. The Automatic Chemicals Filling Machine has an air consumption of 0.6m³/min, which is relatively low compared to other filling machines on the market. This means that the machine is more energy-efficient and cost-effective to operate, which can help businesses to save money in the long run.

Filling accuracy is another important factor when it comes to filling chemicals. The Automatic Chemicals Filling Machine has a filling accuracy of $\pm 0.5\%$, which ensures that the correct amount of chemical is dispensed into each container. This helps to minimize waste and ensure that the product is consistent and of high quality.

The Automatic Chemicals Filling Machine is designed specifically for use with chemicals. It is capable of filling a wide range of chemicals, including liquids, powders, and granules. This makes it a versatile option for businesses that need to fill different types of chemicals on a regular basis.

In summary, the Automatic Chemicals Filling Machine is an excellent choice for businesses that need a reliable and efficient solution for filling chemicals. Its automatic operation, energy-efficient design, and accurate filling capabilities make it a top choice for chemical manufacturers. With its four filling nozzles and versatile application, it is an investment that can help businesses to increase their productivity and profits over time.

Features:

Product Name: Automatic Chemicals Filling Machine

Application: Chemicals

Capacity: 1000 Bottles/hour

Air Consumption: 0.6m³/min

Filling Accuracy: $\pm 0.5\%$

Bottle Type: Round/Square/Oval

Technical Parameters:

Material	Stainless Steel
Power Supply	220V/50Hz
Filling Accuracy	$\pm 0.5\%$
Air Consumption	0.6m ³ /min
Air Pressure	0.6-0.8Mpa
Power Consumption	1.5KW
Application	Chemicals
Bottle Type	Round/Square/Oval
Filling Volume	25L-200L
Control System	PLC

Applications:

The machine is equipped with a PLC control system that offers easy operation and control. The user-friendly interface allows for easy adjustments to be made to the filling volume, filling speed, and other parameters to suit different filling requirements. The machine also has a memory function that saves the parameters for future use. The Automatic Chemicals Filling Machine is suitable for a variety of applications and is ideal for use in chemical manufacturing plants, laboratories, and research facilities. It is particularly useful for filling hazardous chemicals, as it minimizes the risk of spillage and exposure to harmful chemicals.

The machine has a low air consumption of 0.6m³/min, making it energy-efficient and cost-effective. It also has a power consumption of 1.5KW, which makes it an eco-friendly option for chemical filling.

The AFM-1000 model of the Automatic Chemicals Filling Machine is a versatile machine that can handle different types of chemical containers, including bottles, cans, and drums. It can also fill a variety of chemicals, including acids, alkalis, solvents, and other hazardous chemicals.

The Automatic Chemicals Filling Machine is designed for use in a wide range of scenarios, including chemical manufacturing plants, laboratories, research facilities, and other industrial settings. It is perfect for filling chemicals in small to medium-sized containers, making it an essential tool for businesses that require precise and efficient chemical filling.

Customization:

Brand Name: Automatic Chemicals Filling Machine

Touch Screen: 7 Inch

Filling Accuracy: $\pm 0.5\%$

Application: Chemicals

Filling Nozzle: 4

Air Consumption: 0.6m³/min

With our customization services, you can tailor the Chemicals Filling Machine to your unique requirements and specifications. Whether you need a different size or capacity, or additional features to enhance your workflow, we can help you create the perfect solution for your business.

Support and Services:

The Automatic Chemicals Filling Machine is a sophisticated equipment that requires expert technical support to ensure optimal performance. Our team of highly trained technicians and engineers are available to provide the following services:

- Installation and commissioning of the machine
- Regular maintenance and servicing
- Troubleshooting and repair services
- Upgrades and modifications to improve machine efficiency
- Training and support for operators and maintenance personnel

We are committed to providing excellent customer service and ensuring that our clients get the most out of their investment in our product. Contact us for more information on our technical support and services.

Packing and Shipping:

Product Packaging:

Dimensions: 120cm x 80cm x 180cm

Weight: 250kg
Material: Wooden crate
Shipping:
Shipping Method: Sea freight
Delivery Time: 30-45 days
Shipping Cost: To be calculated based on destination
