

Automatic Stainless Steel Capping Automatic Weighing And Filling Machine

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: woodenbox
- Delivery Time: 3months
- Payment Terms: T/T, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Material: Stainless Steel
- Bottle Height: 50-300mm
- Appearance: Good-looking
- Capping Heads: 4 Heads /8 Heads/12 Heads
- Manual: English Version
- Color: White
- Power Supply: 220V/50Hz
- Usage: Plastic Or Glass Bottle Capping
- Highlight: **Automatic Weighing Filling Machine,
Automatic Capping Filling Machine,
Stainless Steel Weighing Filling Machine**

Automatic Stainless Steel Capping Machine Automatic Weighing And Filling Machine

Product Description:

The power supply for this machine is 220V/50Hz, ensuring that it will work reliably and efficiently in any production environment. The machine also comes with an English language manual, making it easy to set up and use right out of the box.

The Automatic IBC Filling Machine is designed to be easy to operate and maintain, with a user-friendly interface and simple controls. The machine is capable of filling a variety of liquids, including water, oil, and non-corrosive liquids, making it suitable for a wide range of applications.

In addition to its filling capabilities, the Automatic IBC Filling Machine also features a Rotary Capping Device, which allows for fast and efficient capping of containers. The machine also has a Lid Tightening Machine, which ensures that lids are securely tightened and sealed to prevent leaks and spills. And with its Bottle Capping Machine, the Automatic IBC Filling Machine is capable of capping bottles of various sizes and shapes.

Overall, the Automatic IBC Filling Machine is a reliable, efficient, and versatile machine that is perfect for a variety of filling applications. Whether you need to fill large containers or small bottles, this machine is up to the task. And with its Rotary Capping Device, Lid Tightening Machine, and Bottle Capping Machine, it is a comprehensive solution that will streamline your production process and improve your overall efficiency.

Features:

Product Name: Automatic IBC Filling Machine

Voltage: AC 380V,50Hz

Manual: English Version

Capping Heads:

4 Heads

8 Heads

12 Heads

Bottle Height: 50-300mm

Color: White

Features:

1) Bottle Capping Machine

3) Lid Tightening Machine

9) Rotary Capping Device

Technical Parameters:

Capping Speed	700-1000pcs
Material	Stainless Steel
Power Supply	220V/50Hz
Appearance	Good-looking
Capping Heads	4 Heads /8 Heads/12 Heads
Manual	English Version
Head	2-24
Voltage	AC 380V, 50Hz
Operation	Semi-automatic
Bottle Height	50-300mm

Applications:

The Servo Tracking Capping Machine is ideal for companies in the food and beverage industry that require fast and efficient capping solutions. Whether it's bottling sauces, jams, or juices, this machine can cap different types of bottles such as glass or plastic bottles. The machine can also cap jars with ease, making it a versatile option for companies that require a jar capper machine.

Additionally, the Servo Tracking Capping Machine is perfect for companies that need a lid tightening machine. The machine's high accuracy servo motor ensures that lids are tightened consistently, preventing any leaks or spills. This feature is especially important for companies that require a tight seal, such as those in the cosmetics and pharmaceutical industry.

The Servo Tracking Capping Machine is also perfect for small and medium-sized companies that require a semi-automatic bottle capping machine. The machine is easy to operate and comes with an English manual, making it accessible to a wider audience. Companies that require a capping solution but do not have the budget for a fully automatic machine can benefit from the Servo Tracking Capping Machine.

In conclusion, the Servo Tracking Capping Machine is a versatile and efficient capping solution for various industries. Its high-quality material, head capacity, and servo motor make it a reliable option for companies that require a bottle capping machine, lid tightening machine, or jar capper machine.

Customization:

Support and Services:

The Automatic IBC Filling Machine product comes with comprehensive technical support and services to ensure optimal performance. Our team of experts is available to assist with installation, maintenance, and troubleshooting of the machine.

We provide training for operators, so they can maximize the efficiency of the filling process and minimize downtime. Our support team is also available to answer any questions and provide guidance on the operation of the machine.

In addition, we offer customization services to meet unique customer specifications. We work closely with our clients to design and build machines that meet their specific needs and requirements.

Our goal is to provide the highest level of service to ensure customer satisfaction and minimize any disruptions to production. Contact us for more information on our technical support and services for the Automatic IBC Filling Machine.

Packing and Shipping:

Product Packaging:

The Automatic IBC Filling Machine will be packaged securely in a wooden crate to ensure safe transportation. The machine will be wrapped in protective material to prevent any scratches or damage during shipping.

Shipping:

The Automatic IBC Filling Machine will be shipped via a freight carrier. The carrier will be selected based on the delivery location and the most cost-effective method for our customers.

Customers will be provided with a tracking number once the shipment is dispatched so they can track the status of their delivery.
