

## Hot Sale Semi Automatic IBC Filling And Capping Machine For Liquid

Our Product Introduction

### Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

### Product Specification

- Voltage: AC 380V,50Hz
- Manual: English Version
- Bottle Height: 50-300mm
- Appearance: Good-looking
- Power Supply: 220V/50Hz
- Usage: Plastic Or Glass Bottle Capping
- Meterial: Stainless Steel
- Highlight: **Liquid IBC Filling And Capping Machine,  
Semi Automatic IBC Filling Capping Machine,  
IBC Filling Capping Machine For Liquid**

## Product Description

### Semi Automatic IBC Filling And Capping Machine Auto Liquid Filling Machine

#### Product Description:

With a voltage of AC 380V,50Hz, this machine is built to handle heavy-duty usage and is highly durable. The machine comes with a semi-automatic operation, which ensures that the filling and capping process is smooth and efficient. This feature also ensures that the machine can be easily operated by a single operator, reducing the need for additional staff.

The Automatic IBC Filling Machine comes with a rotary capping device that ensures that the capping process is quick and accurate. The machine is available with capping heads ranging from 4 heads to 12 heads, giving you the flexibility to choose the right machine for your production needs. The capping heads are designed to handle a wide range of container sizes, making this machine suitable for use with a variety of different containers.

In summary, the Automatic IBC Filling Machine is a highly efficient and reliable bottle capping machine that is designed to meet the demands of industrial production. With its high-speed capping capability, wide range of head options, and durable construction, this machine is an ideal choice for businesses looking to streamline their production process. The rotary capping device and semi-automatic operation ensure that the machine is easy to use and provides accurate and reliable results every time.

#### Features:

Product Name: Automatic IBC Filling Machine

Color: White

Operation: Semi-automatic

Voltage: AC 380V,50Hz

Manual: English Version

Warranty: 1 Year

Jar Capper Machine

Flip-Off Capping Unit

Flip-Off Capping Unit

#### Technical Parameters:

Operation	Semi-automatic
-----------	----------------

Bottle Height	50-300mm
Usage	Plastic or Glass Bottle Capping
Manual	English Version
Color	White
Head	2~24
Warranty	1 Year
Material	Stainless Steel
Capping Speed	700~1000pcs
Capping Heads	4 Heads / 8 Heads / 12 Heads

## Applications:

The Servo tracking capping machine is ideal for various occasions and scenarios. Below are some of these scenarios:

1. Pharmaceutical Industry: The machine is perfect for capping medicine bottles with flip-off caps. The flip-off capping unit ensures that the caps are tightly sealed, which helps to prevent contamination and keep the medicine fresh. The machine is also suitable for capping bottles of different sizes and shapes, making it versatile for pharmaceutical companies.
2. Cosmetic Industry: The machine is ideal for capping bottles of beauty products such as creams, lotions, and serums. The lid tightening machine ensures that the lids are tightly sealed, preventing any leakage that might occur during transportation. The machine is also efficient for high-speed production lines, which is essential for cosmetic companies that produce large quantities of products.
3. Food and Beverage Industry: The machine is perfect for capping bottles of different sizes and shapes. The screw cap machine ensures that the caps are tightly sealed, which helps to preserve the freshness of the food and beverages. The machine is also efficient for high-speed production lines, making it ideal for food and beverage companies that produce large quantities of products.
4. Chemical Industry: The machine is suitable for capping bottles of different sizes and shapes. The flip-off capping unit ensures that the caps are tightly sealed, which helps to prevent contamination and keep the chemicals fresh. The machine is also efficient for high-speed production lines, making it ideal for chemical companies that produce large quantities of products.

In conclusion, the Servo tracking capping machine is a versatile machine that is ideal for different industries. The machine's flip-off capping unit, lid tightening machine, and screw cap machine make it efficient for capping bottles of different sizes and shapes. The machine is also efficient for high-speed production lines, making it a valuable asset to companies that produce large quantities of products.

## Customization:

Our Servo tracking capping machine, the perfect solution for your automatic IBC filling needs, now comes with the option of product customization services to meet your specific requirements. With a warranty of 1 year, our machine is designed to handle bottles with a height of 50-300mm and operates on AC 380V,50Hz voltage and 220V/50Hz power supply. The capping speed ranges from 700~1000pcs.

Our customization services include:

Screw Cap Machine customization to fit your specific cap size and shape requirements

Jar Capper Machine customization to handle jars of different sizes and shapes

Lid Tightening Machine customization to ensure the perfect tightness for your product

## Support and Services:

The Automatic IBC Filling Machine is designed to provide high-speed and accurate filling of IBC containers with liquids or semi-liquids. Our team of technical support and service experts is committed to ensuring that your machine operates efficiently and effectively, minimizing downtime and maximizing productivity. Our services include:

Installation and commissioning of the machine

Training for operators and maintenance personnel

Onsite maintenance and repairs

Remote technical support

Supply of genuine spare parts

Upgrades and retrofits to improve machine performance

Our technical support and service team is available 24/7 to answer any questions you may have about the machine or its operation. We strive to provide prompt and reliable service to ensure that your production line runs smoothly and efficiently.

## Packing and Shipping:

Product Packaging:

Dimensions: 2200mm x 1200mm x 1900mm

Weight: 800kg

Packaging material: Wooden crate

Shipping:

Shipping method: Sea freight

Delivery time: 30-45 days

Shipping cost: To be determined based on destination
