

High Experience Automatic IBC Intermediate Bulk Container Filling Machine Powerful

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG-IBC-10
- Minimum Order Quantity: 1
- Price: 10000USD
- Packaging Details: woodenbox
- Delivery Time: 3months
- Payment Terms: T/T, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Color: White
- Voltage: AC 380V,50Hz
- Usage: Plastic Or Glass Bottle Capping
- Appearance: Good-looking
- Bottle Height: 50-300mm
- Power Supply: 220V/50Hz
- Manual: English Version
- Warranty: 1 Year
- Highlight: Intermediate Bulk Container Filling Machine,
Powerful Automatic IBC Filling Machine,
High Experience Automatic IBC Filling Machine

Product Description

200L Ton Barrel Common Rocker Arm Chemical Liquid Water Automatic Filling Machine

Product Description:

The Automatic IBC Filling Machine comes with a range of features that make it the perfect choice for businesses looking to increase their production capacity. One of its key features is the capping speed, which can range from 700 to 1000pcs. This means that businesses can expect to fill and cap a large number of containers within a short period of time, increasing their productivity and profitability.

The Automatic IBC Filling Machine is also designed to be easy to use, even for those who are not familiar with the machine. It comes with an English version manual that provides clear and concise instructions on how to use the machine. This ensures that businesses can begin using the machine right away, without any delays or complications.

Another key feature of the Automatic IBC Filling Machine is its capping heads. This machine comes with a choice of 4, 8, or 12 heads, depending on the specific needs of the business. This flexibility ensures that businesses can choose the right number of heads to meet their production needs, making the machine highly versatile and adaptable.

The Automatic IBC Filling Machine also functions as a screw cap machine and a lid tightening machine. This means that businesses can use this machine to fill and cap containers with a screw cap, ensuring that the container is tightly sealed and secure. This ensures that the product inside the container remains fresh and safe for consumption.

Finally, the Automatic IBC Filling Machine is equipped with a rotary capping device, which ensures that the capping process is smooth and consistent. This device helps to reduce errors and ensure that the capping process is completed efficiently and accurately.

In conclusion, the Automatic IBC Filling Machine is a highly efficient, reliable, and versatile machine that is perfect for businesses looking to increase their production capacity. Its range of features, including its capping speed, capping heads, screw cap machine, lid tightening machine, and rotary capping device, make it a valuable investment for any business in the manufacturing and packaging industry.

Features:

Product Name: Automatic IBC Filling Machine

Capping Heads:

4 Heads

8 Heads

12 Heads

Warranty: 1 Year

Bottle Height: 50-300mm

Material: Stainless Steel

Power Supply: 220V/50Hz

Screw Cap Machine

Flip-Off Capping Unit

Rotary Capping Device

Technical Parameters:

Color	White
-------	-------

Power Supply	220V/50Hz
Capping Speed	700~1000pcs
Operation	Semi-automatic
Warranty	1 Year
Capping Heads	4 Heads /8 Heads/12 Heads
Head	2~24
Material	Stainless Steel
Manual	English Version
Voltage	AC 380V,50Hz

Applications:

The Servo tracking capping machine is a versatile machine that is suitable for various occasions and scenarios. It is commonly used in the pharmaceutical, food, and chemical industries. Here are some of the product application occasions and scenarios:

1. Bottle Capping: The Servo tracking capping machine can be used for capping bottles of different sizes and shapes. It is suitable for bottle heights ranging from 50mm to 300mm. The machine comes with 2 to 24 heads, which means it can cap multiple bottles at a go. This makes it ideal for high-speed production lines.

2. Flip-Off Capping Unit: The Servo tracking capping machine comes with a flip-off capping unit that is suitable for capping vials. The flip-off capping unit is designed to ensure that the caps are sealed tightly and securely. This makes it ideal for the pharmaceutical industry.

3. Jar Capper Machine: The Servo tracking capping machine is also suitable for capping jars. It comes with 4, 8, or 12 capping heads, which means it can cap multiple jars at a go. This makes it ideal for food and chemical industries that use jars.

4. High-Speed Production Lines: The Servo tracking capping machine is suitable for high-speed production lines. It comes with a powerful motor that ensures that the capping process is fast and efficient. The machine is also easy to operate, which means it can be used by both skilled and unskilled operators.

5. English Version Manual: The Servo tracking capping machine comes with an English version manual, which makes it easy to operate. The manual provides clear instructions on how to operate the machine, which means that operators can quickly learn how to use it.

6. Power Supply: The Servo tracking capping machine comes with a power supply of 220V/50Hz. This means that it can be used in different countries without the need for a voltage converter.

7. Automatic Capping: The Servo tracking capping machine is an automatic capping machine, which means that it does not require manual intervention. Once the bottles or jars are placed on the conveyor belt, the machine automatically caps them. This makes it ideal for high-volume production lines.

Customization:

Support and Services:

The Automatic IBC Filling Machine is a high-performance and reliable solution for the filling of intermediate bulk containers (IBCs). It features a fully automated process that ensures accurate and efficient filling of various types of liquids, including hazardous chemicals and flammable liquids.

Our technical support team is available to provide assistance with the installation, setup, and maintenance of the Automatic IBC Filling Machine. We offer training sessions to ensure that your staff is fully equipped to operate the machine safely and effectively.

In addition to technical support, we also offer a range of services to help optimize the performance of the Automatic IBC Filling Machine. Our team can provide customized solutions to meet your specific needs, including upgrades, spare parts, and retrofitting.

At our company, we are committed to providing exceptional customer service and support. Contact us to learn more about our Automatic IBC Filling Machine and how we can help your business achieve its goals.

Packing and Shipping:

Product Packaging:

The Automatic IBC Filling Machine will be securely packaged in a wooden crate to prevent any damage during transport.

The crate will be labeled with the product name, model number, and shipping information for easy identification.

Shipping:

The Automatic IBC Filling Machine will be shipped via freight carrier to the customer's specified location.

The customer will be provided with a tracking number and estimated delivery date once the product has been shipped.

The customer is responsible for unloading the product from the freight carrier upon delivery.

Any additional shipping fees or customs charges will be the responsibility of the customer.
