

## Advanced Precision Lube Oil Filling Machine Boost Production

Our Product Introduction

for more products please visit us on sg-packs.com

### Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

### Product Specification

- Particle Size Of Finished Product: 0.5-3mm
- Moisture Content Of Raw Material: ≤15%
- Model: PGS
- Warranty: 1 Year
- Voltage: 380V
- Power: 5-30 KW
- Weight: 500-1000kg
- Dimension: 1200\*800\*1500mm
- Highlight: Advanced Lube Oil Filling Machine,  
Precision Lube Oil Filling Machine,  
Boost Production Lube Oil Filling Machine

## Product Description

### Lube Oil Filling Machine Boost Your Production With Lube Oil Filling Machine Advanced Technology And Precision

#### Product Description:

One of the main features of this machine is its high efficiency, which enables it to fill large volumes of lube oil in a short amount of time. This is particularly important for industries that require a high volume of production to meet the demand of the market. Additionally, the machine is designed with easy operation in mind, which makes it user-friendly and easy to operate even for those who lack technical skills.

Another feature of the Lube Oil Filling Machine is its low noise level, which ensures that the machine operates quietly and does not cause disturbances in the workplace. This is an important consideration, especially in industries where noise pollution is a concern.

The machine weighs between 500-1000kg and operates at a frequency of 50Hz. The model number of this machine is PGS, which is widely recognized in the industry for its reliability and durability.

Overall, the Lube Oil Filling Machine is an essential piece of equipment for any industry that requires the filling of lubricating oil into containers with precision and accuracy. Its high efficiency, easy operation, and low noise make it a top choice for those in the market for a reliable and efficient lube oil filling machine.

This machine can also be used in combination with other equipment such as powder encapsulation machines, granulation machinery for powders, and particle forming granulators to create a complete production line for the pharmaceutical, chemical, and food industries.

#### Features:

Product Name: Lube Oil Filling Machine

Warranty: 1 Year

Weight: 500-1000kg

Moisture Content Of Raw Material:  $\leq 15\%$

Particle Size Of Finished Product: 0.5-3mm

Features:

High Efficiency

Easy Operation

Low Noise

Keywords: Powder granulator series, Powder agglomeration equipment, Powder agglomeration equipment

Technical Parameters:

Weight	500-1000kg
Dimension	1200*800*1500mm
Frequency	50Hz
Moisture Content Of Raw Material	≤15%
Application	Pharmaceutical, Chemical, Food, And Other Industries
Warranty	1 Year
Granulation Rate	≥95%
Material	Stainless Steel
Model	PGS
Capacity	1-10 Tons/hour

Applications:

The particle size of the finished product ranges from 0.5-3mm, which makes it ideal for use in a wide range of industries, including petrochemicals, coatings, and lubricants. The machine is compact and measures 1200\*800\*1500mm, making it easy to transport and install.

The granulation rate of this machine is ≥95%, which makes it highly efficient and effective. The machine uses a powder compaction granulator, which is part of the powder granulator series. This granulation equipment for powders is designed to produce high-quality granules that are uniform in size and shape.

The 25L lube oil filling production line is widely used in a variety of product application occasions and scenarios, including the production of lubricants, coatings, detergents, and other industrial products. It is also used in the food and pharmaceutical industries to produce granules for use in various products.

This machine is easy to operate and maintain, making it a preferred choice for many industries. The weight of the machine ranges from 500-1000kg, making it easy to move and handle. With its high efficiency and versatility, the 25L lube oil filling production line is a must-have for any industry that requires granulation equipment for powders.

Customization:

Support and Services:

The Lube Oil Filling Machine is a high-quality product designed to accurately and efficiently fill lube oil into containers of various sizes. Our technical support team is available to assist with any questions or concerns you may have regarding the operation and maintenance of the machine. Additionally, we offer a range of services to ensure optimal performance and longevity of the equipment, including:

- Installation and commissioning
- Training for operators and maintenance personnel
- Regular maintenance and servicing
- Repairs and replacements of parts
- Upgrades and customization

Our goal is to provide exceptional support and services to our customers to ensure their satisfaction and success with our product.

Packing and Shipping:

Product Packaging:

- Wooden crate packaging
- Bubble wrap protection for delicate components
- Product manual and installation guide included

Shipping:

- Ships from our manufacturing facility within 3-5 business days
- Standard ground shipping via reputable carriers
- Shipping cost calculated at checkout based on destination and weight
