

220V/50Hz Power Supply Liquid Up Filling Machinery For Liquid Products Manufacturing

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: CHINA
- Brand Name: Liquid Filling And Capping Machine
- Certification: CE
- Model Number: SG20F
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 30days
- Payment Terms: TT
- Supply Ability: 1set/week

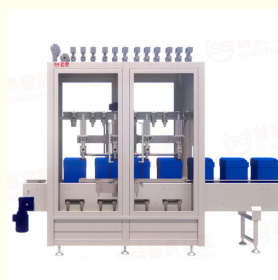

Product Specification

- Suitable For: Liquid Products
- Filling Accuracy: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
- Weight: 2000kg
- Filling Nozzles: 4/6/8/12
- Power Supply: 220V/50Hz
- Air Pressure: 0.4-0.6MPa
- Product: 5L Barrel Liquid Filling And Capping Machine
- Control System: PLC
- Highlight: **Liquid Up Filling Machinery, Liquid Products Manufacturing, 220V chemical filling equipment**

Product Description

Product Description:

Our liquid up-filling machinery is equipped with advanced features that guarantee consistent filling, regardless of the viscosity, density, or temperature of your liquid products. With a weight of 2000kg, this machine is sturdy and stable, ensuring durability and safety.

The control system is powered by a PLC, ensuring accurate and efficient control of the filling process. This allows for easy customization of filling parameters to suit your specific product requirements, ensuring accurate filling every time.

Our liquid up-filling machinery is designed to operate with air pressure ranging from 0.4-0.6MPa, ensuring that the filling process is smooth and efficient. The machine is suitable for filling a wide range of liquid products, including but not limited to, water, juice, oil, and chemical liquids.

The machine is equipped with up to 12 filling nozzles, which can be customized to suit your specific requirements. This allows for the filling of multiple containers simultaneously, saving time and improving efficiency. Whether you require 4, 6, 8, or 12 filling nozzles, our machine can be customized to meet your needs.

With our liquid up-filling machinery, you can be assured of a reliable and efficient filling process, ensuring the consistent delivery of high-quality products to your customers. Our hydraulic liquid filling machines are a cost-effective solution that guarantees excellent value for money.

Features:

Product Name: Chemical Filling Machines

Air Pressure: 0.4-0.6MPa

Filling Accuracy: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine

Weight: 2000kg

Power Supply: 220V/50Hz

Product: 5L Barrel Liquid Filling And Capping Machine

Features:

liquid up-filling machinery

hydraulic liquid filling machines

hydraulic liquid filling machines

Technical Parameters:

Technical Parameter	Value
Filling Accuracy	Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
Suitable For	Liquid Products
Weight	2000kg
Power Supply	220V/50Hz
Product	5L Barrel Liquid Filling And Capping Machine
Air Pressure	0.4-0.6MPa
Filling Nozzles	4/6/8/12
Control System	PLC

This Chemical Filling Machine product is a liquid up-filling machinery with pouring and capping systems.

Applications:

The Liquid Filling And Capping Machine is a state-of-the-art hydraulic liquid filling machine that is perfect for filling large containers such as barrels, bottles, cans, and other containers. This machine is specifically designed to meet the needs of large-scale production facilities that require high-speed filling and capping systems. The machine is suitable for liquid products such as chemicals, oils, and other liquids that require precise filling and capping.

The Liquid Filling And Capping Machine comes with a PLC control system that is easy to use and allows for accurate filling and capping. The machine is certified with CE which means that it meets the highest standards of safety and quality. The minimum order quantity for this machine is 1, and it is packaged in a wooden box for safe transport.

The machine operates on a power supply of 220V/50Hz and requires an air pressure of 0.4-0.6MPa. The product is specifically designed for 5L barrel liquid filling and capping, making it ideal for large-scale production facilities that require high-speed filling and capping systems.

The Liquid Filling And Capping Machine is perfect for various product application occasions and scenarios such as:

Chemical Manufacturing Plants: This machine is ideal for chemical manufacturing plants that require high-speed hydraulic liquid filling machines for filling large containers such as barrels, bottles, and cans with precise measurements. The PLC control system ensures that

the filling and capping are accurate, making it ideal for use in chemical manufacturing plants.

Oil Production Facilities: The machine is perfect for oil production facilities that require a hydraulic liquid filling machine for filling large containers with oils such as lubricants, engine oil, and other types of oils. The machine's high-speed filling and capping system ensure that the process is quick and efficient, reducing downtime and increasing productivity.

Liquid Soap Manufacturing Plants: The Liquid Filling And Capping Machine is perfect for liquid soap manufacturing plants that require a high-speed filling and capping system for filling large containers with liquid soap. The machine's precision ensures that the containers are filled with the right amount of liquid soap, reducing waste and increasing efficiency.

Pharmaceutical Manufacturing Plants: The machine is ideal for pharmaceutical manufacturing plants that require a hydraulic liquid filling machine for filling large containers with liquid medications. The machine's filling system is designed to be precise, ensuring that the right amount of medication is filled into each container.

The Liquid Filling And Capping Machine is an excellent investment for any production facility that requires a hydraulic liquid filling machine for filling large containers with precision and efficiency. The machine's high-speed filling and capping system, along with its precision and accuracy, make it an ideal choice for various product application occasions and scenarios.

Payment terms for the Liquid Filling And Capping Machine is TT, and it is available for purchase with a minimum order quantity of 1. The machine is packaged in a wooden box for safe transport, ensuring that it arrives in perfect condition.

Customization:

Support and Services:

Our Chemical Filling Machines come with technical support and services to ensure that they function optimally and efficiently. Our team of experts is available to provide assistance with installation, operation, and maintenance of the machines.

Additionally, we offer training services to ensure that your staff is equipped with the necessary skills to operate the machines. We also provide spare parts and repair services to ensure that any issues that arise are promptly addressed.

Our goal is to provide you with high-quality and reliable machines that meet your specific needs. Therefore, we are committed to providing exceptional support and services to ensure your satisfaction.

Packing and Shipping:

Product Packaging:

Our Chemical Filling Machines are carefully packaged to ensure safe delivery to our customers. They are first wrapped in protective material to prevent any scratches or damages during transportation. Then, they are placed in a sturdy cardboard box with foam padding to provide extra protection. Finally, the box is sealed with strong adhesive tape to prevent any tampering during transit.

Shipping:

We offer worldwide shipping for our Chemical Filling Machines. Once your order is confirmed, we will process it within 24-48 hours. We use reliable shipping carriers to ensure timely delivery of your order. The shipping cost and estimated delivery time will depend on your location and the size of the order. You will receive a tracking number once your order has been shipped, so you can track its progress and plan for its arrival.

FAQ:

Q: What is the brand name of the filling machine?

A: The brand name of the filling machine is Liquid Filling And Capping Machine.

Q: Is this filling machine certified?

A: Yes, this filling machine is CE certified.

Q: What is the minimum order quantity for this filling machine?

A: The minimum order quantity for this filling machine is 1.

Q: How is the filling machine packaged for shipping?

A: The filling machine is packaged in a wooden box for shipping.

Q: What are the payment terms for purchasing the filling machine?

A: The payment terms for purchasing the filling machine are TT.
