

PLC Controlled Large Capacity 200L Semi Automatic Drum Filling Machine

Our Product Introduction

for more products please visit us on sg-packs.com

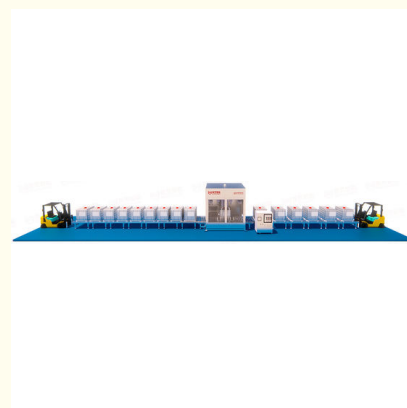

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

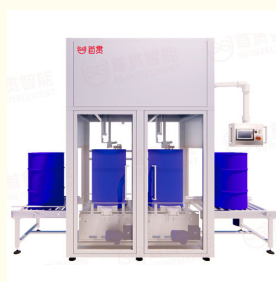

Product Specification

- Suitable For: Liquid Products
- Control System: PLC
- Filling Accuracy: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
- Air Pressure: 0.4-0.6MPa
- Power Supply: 220V/50Hz
- Filling Nozzles: 4/6/8/12
- Weight: 2000kg
- Product: 200L Barrel Liquid Filling And Capping Machine
- Highlight: 200L semi automatic drum filling machine, PLC Controlled drum filling equipment, Large Capacity drum filling equipment

Product Description

PLC Controlled Large-Capacity Drum Filling Machine for 200L Semi-Automatic Filling Machine

Product Description:

The Chemical Filling Machines are equipped with a programmable logic controller (PLC) that controls the entire filling process, ensuring that the filling and capping process is accurate and efficient. The PLC also allows for the customization of the filling process to suit different liquid types, further improving the accuracy and efficiency of the filling process.

The Chemical Filling Machines have a power supply of 220V/50Hz, which is readily available in most parts of the world. The machines also have an air pressure range of 0.4-0.6MPa, ensuring that the filling process is regulated and consistent. The hydraulic liquid filling machines are designed to fill liquid products, such as shampoo, oil, and other viscous liquids, ensuring that the products are filled to the desired level.

The Chemical Filling Machines are easy to operate, with a user-friendly interface that allows operators to monitor and control the filling process. The machines are also equipped with safety features that prevent accidents and injuries during operation, ensuring that the filling process is safe and secure.

In conclusion, the Chemical Filling Machines are a set of high-quality hydraulic liquid filling machines that are designed to handle large volumes of liquid with precision and accuracy. They are equipped with a PLC control system, making them efficient and customizable, and have a power supply of 220V/50Hz, making them suitable for use in most parts of the world. The machines are easy to operate and have safety features that ensure the filling process is safe and secure. If you're looking for a reliable and efficient liquid up-filling machinery, the Chemical Filling Machines are an excellent choice.

Features:

Product Name: Chemical Filling Machines

Filling Nozzles: 4/6/8/12

Product: 5L Barrel Liquid Filling And Capping Machine

Air Pressure: 0.4-0.6MPa

Power Supply: 220V/50Hz

Control System: PLC

Our hydraulic liquid filling machines are the perfect solution for filling and capping 5L barrels with precision and efficiency.

Technical Parameters:

Suitable For	Liquid Products
Weight	2000kg
Filling Nozzles	4/6/8/12
Filling Accuracy	Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
Power Supply	220V/50Hz
Product	200L Barrel Liquid Filling And Capping Machine
Air Pressure	0.4-0.6MPa
Control System	PLC

This Chemical Filling Machine is suitable for liquid products and has a weight of 2000kg. It features 4/6/8/12 filling nozzles and has high filling accuracy using the Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine. The power supply required is 220V/50Hz and it is designed for filling 5L barrel liquid products. The machine operates under air pressure of 0.4-0.6MPa and is controlled by a PLC. It also includes pouring and capping systems and can be categorized as a hydraulic liquid filling machine.

Applications:

One application occasion for this product is in the beverage industry. With the ability to fill and cap various types of liquids, such as water, juice, and soda, the Liquid Filling And Capping Machine is perfect for small to medium-sized beverage manufacturers. The machine's up-filling functionality ensures that the liquid is filled to the appropriate level, and the capping system ensures that the product is sealed tightly and securely. Additionally, the machine's PLC control system makes it easy to set up and operate, reducing the risk of human error.

Another application occasion for this product is in the chemical industry. Companies that need to fill and cap chemicals such as cleaning products and detergents can benefit from the Liquid Filling And Capping Machine. The up-filling functionality ensures that the chemicals are measured accurately, reducing the risk of spills and accidents. The capping system ensures that the chemicals are sealed securely, preventing any leakage or contamination. This machine is also useful for companies that need to fill and cap oils and lubricants. The Liquid Filling And Capping Machine is also ideal for companies in the pharmaceutical industry that require a pouring and capping system for their liquid products. The machine's ability to fill and cap liquids accurately and securely makes it a great asset for pharmaceutical manufacturers. The PLC control system ensures that the filling and capping process is precise, reducing the risk of contamination and human error. Additionally, the machine's up-filling functionality ensures that the liquid is filled to the appropriate level, ensuring that the product is consistent.

Customization:

Our hydraulic liquid filling machines come with 4, 6, 8, or 12 filling nozzles for efficient liquid up-filling machinery. Our pouring and capping systems are perfect for a variety of liquid products.

Support and Services:

Our Chemical Filling Machines are designed to provide accurate and efficient filling of various chemicals and liquids. We offer technical support and services to ensure that our customers can maximize the use of our machines. Our team of experts can provide guidance on installation, setup, operation, and maintenance of the machines.

We also offer customization services to meet specific requirements of our customers. Our team can work closely with customers to design and build machines that meet their unique needs. We provide training to our customers to ensure that they can operate the machines safely and effectively.

In addition, we offer spare parts and repair services to ensure that our machines are always in good working condition. Our team can quickly diagnose and repair any issues that may arise with the machines. We also offer preventive maintenance services to keep the machines running smoothly and avoid downtime.

Packing and Shipping:

Product Packaging:

The Chemical Filling Machines will be packaged in sturdy wooden crates to ensure maximum protection during transportation. The machines will be securely fastened and padded to prevent any damage during shipping.

Shipping:

The Chemical Filling Machines will be shipped via sea or air freight, depending on the customer's preference and location. We work with reliable shipping companies to ensure timely and safe delivery of our products. Shipping costs will be calculated based on the weight and dimensions of the wooden crates.

FAQ:

Q: What is the brand name of the chemical filling machine?

A: The brand name of the chemical filling machine is Liquid Filling And Capping Machine.

Q: Is the machine certified?

A: Yes, the machine is certified with CE.

Q: What is the minimum order quantity for the machine?

A: The minimum order quantity for the machine is 1.

Q: How is the machine packaged?

A: The machine is packaged in a wooden box.

Q: What are the payment terms for purchasing the machine?

A: The payment terms for purchasing the machine are TT.
