

Automatic 200L Large Iron Barrel Filling Machine For Chemical Wine Filling

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG200F-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: TT
- Supply Ability: 1set/week

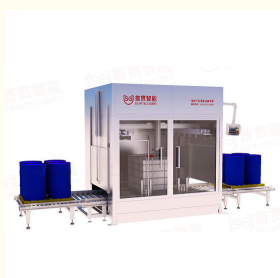

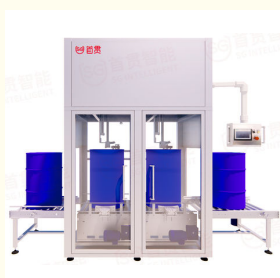

Product Specification

- Product: 200L Barrel Liquid Filling And Capping Machine
- Power Supply: 220V/50Hz
- Weight: 2000kg
- Filling Nozzles: 4/6/8/12
- Filling Accuracy: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine
- Suitable For: Liquid Products
- Air Pressure: 0.4-0.6MPa
- Control System: PLC
- Highlight: 200L barrel filling machine, Chemical barrel filling machine, 200L automatic barrel filling machine

Product Description

200L Large Iron Barrel Chemical Barrel Wine Filling Machine Filling Machine

Product Description:

One of the standout features of this liquid up-filling machinery is the number of filling nozzles that are available. With options for 4, 6, 8, or 12 filling nozzles, this machine can handle a wide range of throughput requirements, making it ideal for small, medium, and large-scale production lines.

The Chemical Filling Machines is specifically designed for the filling of liquid products, such as chemicals, oils, and other viscous liquids. This makes it perfect for companies in the chemical, pharmaceutical, and food processing industries that require precise and consistent filling of their liquid products.

In addition to its filling capabilities, this liquid up-filling machinery also comes equipped with a capping machine. This ensures that the filled barrels are securely sealed, preventing any spills or leaks during transport or storage.

The Chemical Filling Machines has a weight of 2000kg, which is a testament to its heavy-duty construction. This weight ensures that the machine is stable and can handle the rigors of continuous operation without any issues.

In summary, the Chemical Filling Machines is a highly efficient and reliable hydraulic liquid filling machine that is suitable for the accurate and precise filling of liquid products in 5L barrels. With options for 4, 6, 8, or 12 filling nozzles, this machine is perfect for small, medium, and large-scale production lines in the chemical, pharmaceutical, and food processing industries. Its heavy-duty construction and capping machine make it a versatile and reliable addition to any production line that requires consistent and accurate filling of liquid products.

Features:

Product Name: Chemical Filling Machines

Power Supply: 220V/50Hz

Suitable For: Liquid Products

Weight: 2000kg

Control System: PLC

Filling Accuracy: Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine

Features:

Hydraulic liquid filling machines

Pouring and capping systems

Hydraulic liquid filling machines

Technical Parameters:

Air Pressure	0.4-0.6MPa
Power Supply	220V/50Hz
Filling Nozzles	4/6/8/12
Weight	2000kg
Product	200L Barrel Liquid Filling And Capping Machine
Filling Accuracy	Chemical Liquid Filling Machine Series For Water Based Paint Volumetric Liquid Filling Machine

Suitable For	Liquid Products
Control System	PLC

This hydraulic liquid filling machine is suitable for liquid products and comes with pouring and capping systems. It's a liquid up-filling machinery that uses a PLC control system for accurate filling of chemical liquids such as water-based paints.

Applications:

The Liquid Filling And Capping Machine comes with a PLC control system that enables the user to control the filling process easily. The machine is equipped with 4/6/8/12 filling nozzles which allow for multiple products to be filled at once. This up-filling machinery is suitable for various industries such as food and beverage, pharmaceutical, and cosmetics.

The Liquid Filling And Capping Machine is compact and easy to operate. It weighs 2000kg and requires a power supply of 220V/50Hz. The machine is built to last and can be ordered with a minimum order quantity of 1. The packaging details include a wooden box for safe transportation.

This liquid filling machine is suitable for various product application occasions and scenarios. It can be used in food and beverage factories to fill juices, water, milk, and oils. In the pharmaceutical industry, it can be used to fill liquid medicines and syrups. In the cosmetics industry, it can be used to fill creams, lotions, and shampoos.

In conclusion, the Liquid Filling And Capping Machine is an efficient and reliable solution for filling liquid products. Its pouring and capping systems make it easy to use, and its PLC control system allows for easy operation. With its multiple filling nozzles and compact design, it is suitable for various industries and product application occasions.

Customization:

Support and Services:

Our Chemical Filling Machines are designed to provide accurate and efficient filling of various types of chemicals, including corrosive and hazardous liquids. Our technical support team is available to assist with installation, setup, and troubleshooting of the machines to ensure optimal performance and minimize downtime. We also offer a range of services, including preventative maintenance, calibration, and repairs to keep the machines in top condition and extend their lifespan. Our trained technicians use genuine parts and follow strict safety protocols to ensure the highest level of quality and safety. In addition, we provide training and educational resources to our customers to help them operate and maintain the machines properly. Our goal is to provide comprehensive support and services to ensure our customers can rely on our Chemical Filling Machines for their critical filling needs.

Packing and Shipping:

Product Packaging:

The chemical filling machines are packaged in sturdy cardboard boxes.

The machines are wrapped in bubble wrap to prevent any damage during transit.

Each box contains the necessary product manuals and documentation.

Shipping:

We offer worldwide shipping for the chemical filling machines.

Shipping costs will be calculated based on the destination and weight of the package.

Once the order is confirmed, the machines will be shipped within 2 business days.

Customers will receive a tracking number to monitor the shipment status.

FAQ:

Q: What is the brand name of the chemical filling machine?

A: The brand name of the chemical filling machine is Liquid Filling And Capping Machine.

Q: Is the chemical filling machine certified?

A: Yes, the chemical filling machine is CE certified.

Q: What is the minimum order quantity for the chemical filling machine?

A: The minimum order quantity for the chemical filling machine is 1 unit.

Q: What are the packaging details for the chemical filling machine?

A: The chemical filling machine is packaged in a wooden box.

Q: What are the payment terms for the chemical filling machine?

A: The payment terms for the chemical filling machine are TT (Telegraphic Transfer).
