

380V Voltage Powder Granulating Machine Series For Large-Scale Manufacturing Powder Granulator

Our Product Introduction

Basic Information

- Place of Origin: china
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 10000usd
- Packaging Details: woodenbox
- Delivery Time: 30days
- Payment Terms: TT, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Features: High Efficiency, Easy Operation, Low Noise
- Product Name: 380V Voltage Powder Granulating Machine Series For Large-Scale Manufacturing Powder Granulator
- Capacity: 1-10 Tons/hour
- Model: PGS
- Granulation Rate: $\geq 95\%$
- Frequency: 50Hz
- Power: 5-30 KW
- Application: Pharmaceutical, Chemical, Food, And Other Industries
- Highlight: **Large Scale Powder Granulator , Large Scale Powder Granulating Machine , 380V Powder Granulating Machine**

Product Description

380V Voltage Powder Granulating Machine Series For Large-Scale Manufacturing Powder Granulator

Product Description:

With a moisture content of raw material of $\leq 15\%$, our Powder Granulator series is perfect for granulating a variety of powders. The equipment operates at a voltage of 380V and has a dimension of 1200*800*1500mm, making it compact and easy to integrate into your existing production setup.

Our Powder Granulator series is backed by a 1-year warranty, providing you with peace of mind and a long-term solution for your granulation needs. The series is designed to provide efficient and reliable operation, reducing downtime and maximizing productivity. With its easy operation, the Powder Granulator series is perfect for businesses of all sizes. Its low noise level ensures a comfortable working environment, while its compact size allows for easy storage and transportation.

Investing in our Powder Granulator series will provide your business with a reliable and efficient granulation solution. With its high efficiency, easy operation, and low noise, this series of granulation machinery for powders is the perfect addition to any production line.

Technical Parameters:

Dimension	1200*800*1500mm
Frequency	50Hz
Particle Size Of Finished Product	0.5-3mm
Granulation Rate	$\geq 95\%$
Weight	500-1000kg
Voltage	380V
Model	PGS
Moisture Content Of Raw Material	$\leq 15\%$
Material	Stainless Steel
Power	5-30 KW

Applications:

The 25L plastic square barrel filling production line is specifically designed to handle a wide range of powders, including chemicals, food additives, pharmaceuticals, and other industrial materials. With a frequency of 50Hz and voltage of 380V, this product can be used in a variety of settings without any issues.

The Powder Granulator Series product is made of high-quality stainless steel, which provides excellent durability and resistance to corrosion. This ensures that the product remains in top condition for years, even when used in harsh environments.

Our granulation equipment for powders is available in different power options ranging from 5-30 KW, which makes it suitable for both small and large-scale production facilities. The particle size of the finished product is 0.5-3mm, which is perfect for most applications.

The Powder encapsulation machine is perfect for use in the pharmaceutical industry, where it is used to produce capsules, tablets, and other solid dosage forms. It is also used in the food industry to produce different types of food additives, such as flavorings and colorants.

The granulation equipment for powders is also used in the chemical industry to produce fertilizers, pesticides, and other industrial

chemicals. It can also be used in the cosmetics industry to produce different types of powders and creams. Overall, the Powder Granulator Series product is an excellent choice for anyone looking for high-quality granulation equipment for powders. It is efficient, reliable, and versatile, making it suitable for a wide range of applications and scenarios. Whether you are in the pharmaceutical, food, chemical, or cosmetics industry, this product is sure to meet your needs and exceed your expectations.

Support and Services:

The Powder Granulator series product provides the following technical support and services:

- Installation and commissioning guidance
- Training for operators and maintenance personnel
- Regular equipment maintenance and troubleshooting support
- Spare parts supply and replacement
- Upgrades and customization services to meet specific needs
- Technical consultation for process optimization and product quality improvement

Packing and Shipping:

Product Packaging:

The powder granulator series product is packed in a sturdy cardboard box for safe transportation. Inside the box, the product is wrapped in bubble wrap to prevent any damage during shipping. The package also includes a user manual and a power cord.

Shipping:

We use reliable and trusted shipping companies to ensure your product is delivered safely and on time. Shipping charges may vary depending on your location, and we will provide you with a tracking number so you can track your package during transit.

FAQ:

Q: What is the brand name of this powder granulator series product?

A: The brand name of this product is 380V Voltage Powder Granulating Machine Series For Large-Scale Manufacturing Powder Granulator

Q: What is the capacity of the plastic square barrel for this product?

A: The plastic square barrel has a capacity of 25 liters.

Q: What is the production output of this granulator series?

A: The production output of this granulator series varies depending on the specific model. Please refer to the product specifications for more information.

Q: Is this product suitable for granulating all types of powders?

A: This product is designed to granulate a wide range of powders, including but not limited to food powders, pharmaceutical powders, and chemical powders.

Q: Does this product come with a warranty?

A: We do offer a warranty for this product. Please refer to the warranty information provided with the product for more details.
