50Hz Industrial Automatic Piston Pump Oil Lubricant Filling Machine 25L Lube Oil Filling Production Line

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: CE
- Model Number: SG30FY-A
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: wooden box
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 1set/week

Product Specification

- Features: High Efficiency, Easy Operation, Low Noise
- Particle Size Of Finished Product: 0.5-3mm
- Frequency: 50Hz
- Model: PGS
- Weight: 500-1000kg
- Dimension: 1200*800*1500mm
- Application: Pharmaceutical, Chemical, Food, And Other Industries
- Granulation Rate: ≥95%
- Highlight: **Industrial Automatic Lube Oil Filling Machine**, **50Hz Lube Oil Filling Machine**, **25L lubricant filling line**

Product Description

50Hz Industrial Automatic Piston Pump Oil Lubricant Filling Machine 25L Lube Oil Filling Production Line

Product Description:

The Lube Oil Filling Machine operates at a voltage of 380V, ensuring the safety of both the machine and the operator. It has a weight range of 500-1000kg, making it easy to transport and move around the production facility if needed.
The Granulation equipment for powders used in our Lube Oil Filling Machine is designed to achieve a granulation rate of ≥95%, ensuring that the lube oil granules are of the desired size and shape. This feature ensures that the filling process is accurate and consistent, improving the overall quality of the final product.
Our Lube Oil Filling Machine is equipped with Granulation machinery for powders that can handle raw material with moisture content of up to 15%. This feature ensures that the machine can handle different types of lube oil without affecting the quality of the final product.
The Powder granulator series used in our Lube Oil Filling Machine ensures that the lube oil granules are of excellent quality and free from any impurities. This feature ensures that the final product is of high quality and meets the required standards.
Our Lube Oil Filling Machine is designed to cater to the filling needs of various industries and is equipped with features such as Granulation equipment for powders, Granulation machinery for powders, and Powder granulator series. These features ensure that the machine delivers accurate and consistent results, improving the overall quality of the final product.

Features:

Product Name: Lube Oil Filling Machine
Voltage: 380V
Power: 5-30 KW
Moisture Content Of Raw Material: ≤15%
Material: Stainless Steel
Dimension: 1200*800*1500mm
Powder compaction granulator, Powder granulating machine series, Particle forming granulator

Technical Parameters:

Powder granulator series	
Powder spheroidization granulator	
Powder compaction granulator	
Model	PGS
Material	Stainless Steel

Voltage	380V
Frequency	50Hz
Weight	500-1000kg
Dimension	1200*800*1500mm
Particle Size Of Finished Product	0.5-3mm
Moisture Content Of Raw Material	≤15%
Granulation Rate	≥95%
Warranty	1 Year

Applications:

The granulation equipment for powders is used in a variety of applications such as in the pharmaceutical industry for the production of tablets and capsules. The equipment is also used in the food industry for the production of powders and granules. The powder agglomeration equipment is used to agglomerate powders into granules. The powder spheroidization granulator is used to spheroidize powders into spherical pellets.
The 25L lube oil filling production line is ideal for use in industries that require the filling of lube oil into containers. It is suitable for use in the automotive industry, the lubricant industry, and the chemical industry. The machine is designed to be easy to operate and has a low noise level which makes it ideal for use in environments where noise levels need to be kept to a minimum.
The machine is designed to be used in various scenarios such as in small-scale production facilities, medium-scale production facilities, and large-scale production facilities. It is designed to be used in facilities that require a high degree of precision and accuracy in the filling of lube oil into containers. The machine is also ideal for use in facilities that require a high degree of automation and can be integrated into existing production lines.
The 25L lube oil filling production line is a versatile machine that can be used in various applications. Its high efficiency and easy operation make it ideal for use in industries that require the filling of lube oil into containers. The machine is designed to be durable and reliable, which makes it a cost-effective solution for production facilities that require high-quality equipment.

Customization:

Customize your 25L lube oil filling production line with our product customization services, which include:
Particle size customization of finished product: 0.5-3mm
Moisture content customization of raw material: ≤15%
Material customization: Stainless Steel
Frequency customization: 50Hz
1 year warranty
Our customization services can help you tailor your production line to your specific needs. Whether you need a powder granulator series, powder compaction granulator, or particle forming granulator, we can help you create the perfect machine for your application.

Support and Services:

The Lube Oil Filling Machine is a high-quality piece of equipment designed to efficiently and accurately fill various types of lubricating oils into containers. Our product technical support and services include:
- Installation and setup guidance to ensure proper operation and performance
- Comprehensive training for operators to maximize productivity and minimize downtime
- Ongoing maintenance and repair services to keep the machine in optimal condition
- Technical assistance for any issues or questions that may arise
Our team of experienced technicians and engineers are dedicated to providing superior support and services to ensure customer satisfaction and success.

Packing and Shipping:

Product Packaging:
Dimensions: 120cm x 80cm x 150cm
Gross weight: 250kg
Materials: Wooden crate
Shipping:
Delivery time: 5-7 business days
Shipping method: Sea freight
Shipping cost: Calculated based on destination
