

Explosion Proof Anti Corrosion Solvent Ibc Filling Machine

Our Product Introduction

for more products please visit us on sg-packs.com

Basic Information

- Place of Origin: CHINA
- Brand Name: SG
- Certification: ISO9001
- Model Number: SG-IBC-10
- Minimum Order Quantity: 1
- Price: 15000USD
- Packaging Details: woodenbox
- Delivery Time: 3months
- Payment Terms: T/T, L/C, D/A, D/P
- Supply Ability: 10per year

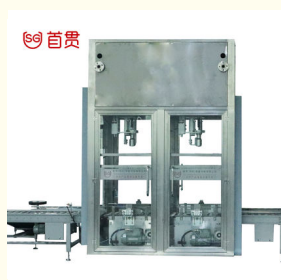

Product Specification

- Type: Filling Machine
- Voltage: 220V/380V
- Packing Material: Wood Packing
- Application: Machinery & Hardware
- Powder: Electric
- Air Consumption: 0.5m³/min
- Filling Range: 10-50 L
- Function: Filler Water-based Paint
- Highlight: **Explosion Proof ibc filling machine, Anti Corrosion ibc filling machine, Solvent ibc filling equipment**

Product Description

IBC Fully Automatic Vertical Explosion-Proof Anti-Corrosion Filling and Capping Machinery Machine for Solvent/Paint/Chemical/Lubricating

Product Description:

The IBC Filling Machine is made from high-quality materials, with the material contact parts made from 304 stainless steel, which ensures that the machine is durable and long-lasting. The use of 304 stainless steel also ensures that the machine is hygienic and easy to clean, making it ideal for use in the food and beverage industry.

The IBC Filling Machine comes with a 1-year warranty, which gives you peace of mind knowing that you are investing in a high-quality and reliable product. This warranty covers any defects in workmanship or materials, ensuring that you get the best value for your money.

This IBC liquid packaging machine is suitable for filling a wide range of materials, including water-based paint. It is designed to be used with IBCs, making it ideal for those who need to fill large quantities of liquid quickly and efficiently.

The IBC Filling Machine is designed for feeding upon liquid surface filling, which ensures that the liquid is filled to the correct level and prevents overfilling. This feature also ensures that the filling process is quick and efficient, allowing you to fill your IBCs in a short amount of time.

In summary, the IBC Filling Machine is a reliable and efficient IBC liquid packaging machine that is ideal for filling water-based paint and other liquids. With its high-quality materials, 1-year warranty, and feeding upon liquid surface filling, this machine is a great investment for those who need to fill their IBCs quickly and efficiently.

Features:

Product Name: IBC Filling Machine

Powder: Electric

Bottle Type: Drum, Barrel, Can

Suitable Materials: IBC

Material Contact Parts: 304 Stainless Steel

Air Consumption: 0.5m³/min

This IBC Filling Machine is a versatile and efficient liquid bottling machine suitable for IBC containers. Its electric power source makes it easy to use and operate. With the ability to fill a variety of different bottle types, including drums, barrels, and cans, this machine is perfect for any packaging needs. The material contact parts of the machine are made of 304 stainless steel, ensuring that the machine is hygienic and easy to clean. The IBC liquid dosing equipment is designed to help fill containers accurately and efficiently, while the IBC liquid dispensing system ensures that the liquid is dispensed in a controlled manner. Overall, this IBC Filling Machine is a reliable and efficient solution for any liquid packaging needs.

Technical Parameters:

Air Consumption	0.5m³/min
Filling Range	10-50 L
Voltage	220V/380V
Application	Machinery & Hardware
Material Contact Parts	304 Stainless Steel
Packing Material	Wood Packing
Type	Filling Machine
Function	Filler Water-based Paint
Feeding Type	Upon Liquid Surface Filling
Suitable Materials	IBC

Applications:

This IBC filling machine is ideal for use in a variety of occasions and scenarios. It is perfect for use in manufacturing plants where large quantities of paint need to be filled into IBCs. This IBC liquid bottling machine is also suitable for use in warehouses that require a high-volume filling system. It is especially useful for companies that need to fill IBCs regularly and want to do so quickly and efficiently. The IBC fully automatic open-fill-top filling machine is highly versatile and can handle different types of IBCs. It is perfect for use with plastic and metal IBCs of varying sizes. It is also suitable for use with IBCs that have different types of valves, making it an excellent choice for companies with diverse IBC needs.

This IBC filling machine is designed to be fully automatic, which means that it is easy to operate and requires minimal supervision. It has a user-friendly interface that allows operators to set up the filling process quickly and easily. The machine also comes with safety features that ensure that the filling process is safe and efficient.

In summary, the IBC fully automatic open-fill-top filling machine is a versatile and efficient filling machine that is perfect for use in a variety of occasions and scenarios. It is an excellent choice for companies that need to fill IBCs regularly and want to do so quickly and efficiently. It is a top-of-the-line IBC liquid filling equipment that is perfect for machinery and hardware applications. If you are looking for a reliable and efficient IBC filling system, the IBC fully automatic open-fill-top filling machine is an excellent choice.

Customization:

- Choose the feeding type: Upon Liquid Surface Filling
- Customize the air consumption to your specific needs: 0.5m³/min
- Opt for an electric powder system
- Personalize your filling machine
- Enjoy a 1-year warranty

Our IBC liquid packaging machine is a top-of-the-line intermediate bulk container filling system that provides efficient and precise filling. With our customization services, you can tailor the machine to your specific needs and preferences, ensuring maximum productivity and performance.

Support and Services:

- Our IBC filling machine is designed for efficient and accurate filling of intermediate bulk containers (IBCs). Our technical support and services include:
- Installation and commissioning
 - Operator training
 - Preventive maintenance
 - Repairs and replacement of parts
 - 24/7 technical support
- Our experienced technicians are available to ensure that your IBC filling machine is operating at peak performance and minimizing downtime. Contact us for more information on our product technical support and services.

Packing and Shipping:

- Product Packaging:
- The IBC Filling Machine will be securely packed in a sturdy and durable wooden crate to prevent any damage during transit.
 - The machine will be wrapped in protective material to avoid any scratches or dents.
 - All necessary accessories and parts will be included in the package.

The package will be clearly labeled with the product name, model number, and any special handling instructions.

Shipping:

The IBC Filling Machine will be shipped via a reliable and reputable shipping company.

The shipping cost will be calculated based on the destination and weight of the package.

The customer will be provided with a tracking number once the package has been shipped.

The estimated delivery time will be provided to the customer upon request.

The customer is responsible for any customs duties or taxes that may be incurred during shipping.

FAQ:

Q: What is the brand name of the filling machine?

A: The brand name of this filling machine is IBC fully automatic open-fill-top filling machine.

Q: What type of containers can be filled using this machine?

A: This machine is designed to fill Intermediate Bulk Containers (IBCs) of various sizes.

Q: Is this machine fully automatic?

A: Yes, this machine is fully automatic which means that it can perform all operations without requiring manual intervention.

Q: What is the fill capacity of this machine?

A: The fill capacity of this machine can be adjusted to fill containers with volumes ranging from 1000 to 1500 liters.

Q: Is it possible to integrate this machine with existing production lines?

A: Yes, this machine can be easily integrated with existing production lines through its PLC control system and customizable conveyor system.
